PROCESS

Prefix – Accommodation Package Offset

For Gaming Rates where the accommodation rolls as “**8800 – Package Rate**” you must first complete a package offset in order to facilitate transferring the charges to W101 for settlement.

To complete this:

- Transfer all relevant charges with posting code “**8800 – Package Rate**” to a new window.
- Using transaction code **1021** (Accommodation – Package Offset)
- Post a negative transaction for the total accommodation rate (shown in the top right corner of the window)
- In the Supplement Field, enter the rate range of the charges offset (eg 23/07/20 – 25/07/20)
- Post a positive transaction for the same amount using the same posting code (**1021**) and copy the Supplement field.
- Transfer the positive **1021** posting to the Comp Window with the relevant authorizer.

Step 2	If the Comp raised does not match the value of the guest's account balance, set a trace for the relevant gaming department to have the comp adjusted.
