Impact of Main Gaming Floor Refurbishment

Gaming Machine Offset

To maintain 2,500 operational gaming machines, an offset area(s) capable of housing in the order of 130 machines is required (50 machines will already be relocated from MGF to the East wide of Level 1). Nominated locations are as follows:

- 49 machines in Tia To space
- 20 additional machines in Teak Room
- 50 additional machines in Level 1 West End Casino

Positive Impact of Relocated Machines

Relocating 180 machines from the Two Up area into the new locations is expected to have a positive impact on contribution of \$600K in F13 and \$200K in F14 – principally on the back of additional machines into Teak.

Negative Impact as a result of MGF disruptions

Based on the phasing information provided by Projects and using the demonstrated historical impact figures (including a 15% proximity impact effect) it is expected that Gaming Machine contribution will reduce by \$2.9m in F13.
