TRANSCRIPT OF PROCEEDINGS (Private Session)

COMMISSIONER: HON. RAY FINKELSTEIN AO QC

IN THE MATTER OF A ROYAL COMMISSION INTO THE CASINO OPERATOR AND LICENCE

MELBOURNE, VICTORIA

10.03 AM, FRIDAY, 07 MAY 2021

Counsel Assisting the Commission (instructed by Corrs Chambers Westgarth as Solicitors Assisting the Commission) MR ADRIAN FINANZIO SC

**Counsel for the State of Victoria** 

MR PETER GRAY QC MR GLEN AYRES

| 10:03 1<br>10:03 2<br>3 | MR FINANZIO: I call Commander Michael Frewen, Acting Assistant Commissioner of Police.   |
|-------------------------|--|
| 4<br>5<br>6<br>7        | ASSISTANT ACTING COMMISSIONER MICHAEL FREWEN, SWORN  |
| 8<br>9                  | EXAMINATION-IN-CHIEF BY MR FINANZIO  |
| 10:03 10                |  |
| 10:04 11                |  |
| 10:04 12                | MR FINANZIO: Commander, can you tell the Commission your   |
| 10:04 13                | full name, please?   |
| 10:04 14                | A 261 17 1 7   |
| 10:04 15                | A. Michael Joseph Frewen.  |
| 10:04 16<br>10:04 17    | Q. And your current occupation?  |
| 10:04 17                | Q. And your current occupation:  |
| 10:04 19                | A. I'm with Victoria Police. I hold the rank of Commander,   |
| 10:04 20                | Crime Command, currently Acting Assistant Commissioner,  |
| 10:04 21                | Crime Command.   |
| 10:04 22                |  |
| 10:04 23                | Q. And your occupational address is known to the   |
| 10:04 24                | Commission, so we won't bother with that. You're attending in  |
| 10:04 25                | response to a Notice to Attend issued 4 May 2021, in having  |
| 10:04 26<br>10:05 27    | accepted short service. Thank you. We want to thank you for that and for accommodating the Commission. You have also             |
| 10:05 27                | I think been provided with a Request for a Statement dated 26/4.   |
| 10:05 29                | I understand from discussions with Counsel that Police have  |
| 10:05 30                | considered that statement, that Request for Statement, I should say.   |
| 10:05 31                |  |
| 10:05 32                | A. That's correct, yes.  |
| 10:05 33                |  |
| 10:05 34                | MR FINANZIO: And one of the purposes, Commissioner, for  |
| 10:05 35<br>10:05 36    | this morning is to hear from Acting Assistant Commissioner<br>Frewen in relation to the breadth of those matters, with a view to |
| 10:05 30                | potentially refining some of the matters and informing the line of   |
| 10:05 38                | our inquiry. The arrangement that has been made is that my   |
| 10:05 39                | learned friend Mr Gray will lead the Acting Assistant  |
| 10:05 40                | Commissioner in response to some of those matters. So I pass to  |
| 10:05 41                | him.   |
| 10:05 42                |  |
| 10:05 43                | COMMISSIONER: Thank you. Mr Gray.  |
| 10:05 44<br>10:05 45    |  |
| 10.05 45                |  |
| 47                      |  |
| .,                      |  |

| 10:05 1              | EXAMINATION-IN-CHIEF BY MR GRAY  |
|----------------------|--|
| 10:05 2              |  |
| 10:06 3              |  |
| 10:06 4              | MR GRAY: Thank you, Commissioner.  |
| 10:06 5              |  |
| 10:06 6              | Q. Acting Assistant Commissioner Frewen, prior to your   |
| 10:06 7              | appointment as Commander of Crime Command, what is your  |
| 10:06 8              | relevant professional experience in relation to investigation,   |
| 10:06 9              | detection, disruption and deterrence of activities of the kind that  |
| 10:06 10             | can occur of a criminal nature in respect of the casino?   |
| 10:06 11             |  |
| 10:06 12             | A. Prior to my current role, which I've held for about two and   |
| 10:06 13             | a half years, I held the rank of Detective Superintendent for two  |
| 10:06 14             | years in charge of Professional Standards Command  |
| 10:06 15             | Investigations Division, which obviously dealt with serious  |
| 10:06 16             | criminality, misconduct within our organisation and aligned  |
| 10:06 17             | organisations, and also sat over the operation on a day-to-day   |
| 10:06 18             | basis of our Discipline Advisory Unit which undertook, I guess   |
| 10:06 19<br>10:06 20 | you'd call it prosecution of police members for discipline   |
| 10:06 20             | offences. Post that, I was the divisional superintendent at  |
| 10:07 21             | North-West Metro Division 4, based at Fawkner which oversaw<br>the Local Government areas of Moonee Valley, Moreland and |
| 10:07 22             | Hume, a very, very socially disadvantaged area, particularly in the  |
| 10:07 23             | Hume area, but very diverse, obviously had a big demographic of  |
| 10:07 25             | business, community members and challenges from  |
| 10:07 26             | socio-economic, high-volume crime, community engagement  |
| 10:07 27             | with a whole lot of community groups and racial backgrounds.   |
| 10:07 28             |  |
| 10:07 29             | Prior to that, I held the rank of detective inspector within Crime   |
| 10:07 30             | Command in a couple of different roles. Most recently I was in   |
| 10:07 31             | charge of the Middle Eastern crime investigation group, known as   |
| 10:07 32             | Santiago. I performed that role for two years, which primarily   |
| 10:08 33             | investigated serious Middle Eastern organised crime across   |
| 10:08 34             | Victoria. Prior to that, I undertook a role in tasking and   |
| 10:08 35             | coordination, which was more around managing Crime   |
| 10:08 36             | Command's resources, controlled operations, major drug   |
| 10:08 37             | investigation, compliance with legislation, covert operations,.  |
| 10:08 38             | And prior to that, as a rank of detective inspector, I was in charge   |
| 10:08 39             | of the Driver Taskforce, which was the murder of Carl Williams,  |
| 10:08 40             | and whilst that was the primary domain of activity, dropping out   |
| 10:08 41             | of that was a lot of investigations, unsolved homicide, organised  |
| 10:08 42             | crime that was connected to the Williams empire and people that  |
| 10:08 43             | popped up in our inquiry.  |
| 10:08 44<br>10:08 45 | As a Senior Sergeant, I was predominantly based in the city, as  |
| 10:08 45             | a uniformed Senior Sergeant, Melbourne East area and Melbourne   |
| 10:09 40             | West, performed that role for about three years, and prior to that   |
| 10.09 4/             | west, performed that fole for about three years, and prior to that   |

10:09 1 I was a Detective Sergeant at Melbourne CIU, which I guess is a segue into the day-to-day operations of Crown Casino. My role 10:09 2 10:09 3 as a Detective Sergeant, not only was it a general role overseeing investigations at ground level for the Melbourne Local 10:09 4 Government area generally, but also what popped up on 10:09 5 10:09 6 a day-to-day basis. 10:09 7 10:09 8 Q. Just stopping you there. In that last role, where you had 10:09 9 on-the-ground supervisory responsibilities in the Melbourne area, 10:09 10 including the casino, was that in 2005? 10:09 11 10:09 12 A. Correct. 10:09 13 10:09 14 Q. And, look, I think we'll leave it there. Thank you very 10:09 15 much. Can I ask you about modern policing approaches and 10:10 16 methodologies at a high level? What is the modern policing approach, and in particular, what is the emphasis given to 10:10 17 investigation by criminal activity type as opposed to what might 10:10 18 10:10 19 have previously been a focus on geography and location-based policing? 10:10 20 10:10 21 10:10 22 A. Crime Command now are broken into around five 10:10 23 operational divisions: Serious Crime Division, the Organised 10:10 24 Crime Division, the State Anti-Gangs Division and the Finance and Cyber Crime Division. They're primarily the largest crime 10:10 25 investigation divisions. Within each of those divisions are 10:10 26 10:10 27 a number of distinct work groups. For example, in the Organised 10:10 28 Crime Division there is a Drug Taskforce, the clandestine Laboratory Squad, the Icarus taskforce which is a joint-up 10:10 29 taskforce with the AFP. We have our Joint Organised Crime 10:11 30 10:11 31 Taskforce with the AFP that does the larger drug importations, 10:11 32 and we have Trident Taskforce, which is a co-housed arrangement 10:11 33 with Border Force and the AFP. 10:11 34 10:11 35 I guess in context of 21st century policing and the environment that we all find ourselves in, particularly the digital age, we need 10:11 36 to be more effective and efficient with the way we tackle and 10:11 37 I guess interdict with higher-order organised crime. And gone 10:11 38 are the days of a place-based focus particularly at state and 10:11 39 10:11 40 national level of organised crime investigation. For example, in 10:11 41 the year 2006, we had an embedded team of investigators within 10:11 42 the Crown Casino complex, and that variously started with a larger work unit and over time, business needs and 10:12 43 10:12 44 investigational strategies and needs changed, morphed, evolved 10:12 45 to the point where the viability from an efficacy and delivering community outcome point of view, crime investigation has 10:12 46 changed. And when we're looking at investigating organised 10:12 47

- 10:12 1 crime and all of the different themes that drop out of it, we are
- 10:12 2 now talking cyber-crime, tech-enabled crime, financial law
- 10:12 3 investigation, following the money, and doing things at a much
- 10:12 4 higher national and international level. And accordingly, policing
- 10:12 5 models changed to match that 21st century environment, and we
- 10:12 6 do now more work than ever with national agencies such as the
- 10:12 7 ACIC, the AFP, AUSTRAC and Border Force, because as we all
- 10:13 8 now know, borders are a notional barrier. Crime is a national and
- 10:13 9 international business, particularly at the higher end, and we need
- 10:13 10 to tackle that with a similar philosophy around how we share our
- 10:13 11 resources, how we share our intelligence, but importantly, how
- 10:13 12 we focus on where we can on higher net worth opportunities
- 10:13 13 around impacting criminal activity, identifying opportunities of
- 10:13 14 restraint, seizure of financial, I guess, assets, and being able to
- 10:13 15 probably, particularly in the world of drug trafficking, having
- 10:13 16 those larger volumes of drugs hit the streets. So that's where our
- 10:13 17 focus is.
- 10:13 18
- 10:13 19 O. And just --
- 10:13 20
- 10:13 21 COMMISSIONER: Sorry, Mr Gray, I just want to ask one
- 10:14 22 question about terminology. This might be an obvious question
- 10:14 23 with an obvious answer. Can you explain to me the difference
- 10:14 24 from a policing perspective between organised crime and serious
- 10:14 25 crime? Because you categorise them differently and everybody
- 10:14 26 speaks about them differently, but I've never been quite on top of
- 10:14 27 where you draw a distinction, if you can draw a hard and fast line,
- 10:14 28 wherever that might be.
- 10:14 29
- 10:14 30 A. Yes. So from a nomenclature perspective within Victoria
- 10:14 31 Police, "serious crime" is what we would colloquially refer to as
- 10:14 32 homicide, rape, serious sex crimes, whereas "organised crime"
- 10:14 33 generally speaking denotes that higher degree of planning and
- 10:14 34 sophistication that is, I guess, ordinarily related to drug
- 10:14 35 trafficking, financial crime, money laundering, fire-arms
- 10:14 36 trafficking, and to a lesser extent, you know, those organised
- 10:15 37 crime gangs or groups commit those sort of organised crimes.
- 10:15 38 That's not to say, though, that they don't also commit serious
- 10:15 39 crime. And you raise an interesting point. The poly-offending of
- 10:15 40 serious crime entities, like there are no borders, they know no
- 10:15 41 themes; they chase money. It's a commercial enterprise to them,
- 10:15 42 and whether they're selling drugs, fire-arms, child pornography,
- 10:15 43 human or sex trafficking, it's all business. It's all money. And
- 10:15 44 sometimes there's a commonality, particularly with outlaw
- 10:15 45 motorcycle gangs. They are organised criminal enterprises.
- 10:15 46
- 10:15 47 COMMISSIONER: Thanks.

```
10:15 1
10:15 2
            MR GRAY: Thank you, Commissioner.
10:15 3
10:15 4
            Keeping the focus on serious and organised crime, because that
            was the flavour of the evidence you've just been giving when you
10:15 5
10:15 6
            talk about the focus on activity rather than locality; is that
10:16
            correct?
10:16 8
10:16 9
            A. Correct.
10:16 10
10:16 11
            Q. Keeping the focus on those topics, how do those
            considerations you've just outlined to the Commissioner impact
10:16 12
10:16 13
            on the proper approach, in your opinion, to policing in respect of
10:16 14
            the casino, at and in respect of the casino?
10:16 15
10:16 16
            A. So, particularly in the domain of organised crime,
10:16 17
            intelligence or an investigation would generally be referred to
            Crime Command or would be worked up within Crime Command
10:16 18
10:16 19
            over a course of sometimes a short or a long time, depending
            upon the nature of the investigation. But first, foremost and final,
10:16 20
            we will follow the theme of what we're investigating, and I guess
10:16 21
10:16 22
            for the ease of the explanation, I'll use drug trafficking. We have
            investigators within Crime Command working solely from Crime
10:16 23
            Command, or working in collaboration with the AFP, the ACIC
10:17 24
            or other law enforcement partners or agencies. We will work up
10:17 25
            a prosecution and investigation and we will follow where the
10:17 26
10:17 27
            evidence takes us.
10:17 28
10:17 29
            Now, for example, often in those investigations, we will engage
10:17 30
            earlier part of Crime Command. We have a Criminal Proceeds
10:17 31
            Squad, and part of their remit is to work in collaboration with the
10:17 32
            primary investigation team to identify opportunity of assets,
10:17 33
            unexplained wealth, and be in a position for when we take final
10:17 34
            action in a resolution phase, to seize or freeze those assets
10:17 35
            accordingly. And often, whether it's through my Criminal
            Proceeds Squad or through other intelligence received by the
10:18 36
            ACIC, AUSTRAC, Fintel Alliance, AFP, information will come
10:18 37
10:18 38
            to bear that particular people of interest in that investigation may
            have frequented Crown Casino. Obviously we do
10:18 39
            an investigation into their activities and we may learn that money
10:18 40
10:18 41
            goes into Crown; large volumes of cash on occasion. Sometimes
10:18 42
            we don't know. But it is --- it doesn't escape our gaze that many of
            the people that we pay attention to, for the want of a better
10:18 43
10:18 44
            expression, go through the doors of Crown Casino. And they
10:18 45
            include all sorts of entities, whether they're singular people of
            interest, outlaw motorcycle gangs, Middle Eastern crime gangs,
10:18 46
            Albanian organised crime. You know, they will click through the
10:18 47
```

| 10:18 1  |  |
|--|--|
| 10:19 2<br>10:19 3<br>10:19 4  | turn-styles somewhere, whether they have accommodation and use that as a group meeting place. We've most recently come across that. Additionally, we've identified that sometimes money goes through Crown Casino. And where we can, we try to follow  |
| 10:19 5  | that as an investigational opportunity.  |
| 10:19 6  |  |
| 10:19 7  | Q. In contrast to the current approach, what was the role of the   |
| 10:19 8  | previous Casino Crime Unit up to 2006, and why is that unit no   |
| 10:19 9  | longer part of the landscape of policing?  |
| 10:19 10<br>10:19 11   | COMMISSIONER: Can I also ask about the size of the unit, and   |
| 10:19 11   | if it changed, how it changed?   |
| 10:19 13   | if it changed, now it changed.   |
| 10:19 14   | A. So the Casino Crime Unit commenced as part of a larger  |
| 10:19 15   | division within crime  |
| 10:22 16   |  |
| 10:22 17   |  |
| 10:22 18   | (Technical difficulties)   |
| 10:22 19   |  |
| 10:22 20   | ADIQUDNED [10.21 AM]   |
| 10:22 21<br>10:22 22   | ADJOURNED [10.21 AM]   |
| 10:22 23   |  |
| 10:22 24   | RESUMED [10.27 AM]   |
| 10:27 25   |  |
| 10:27 26   |  |
| 10:27 27   | COMMISSIONER: Just to explain, I hope you don't have these   |
| 10:27 28   | sort of problems, Commander, because they'll be worse for you  |
| 10:27 29   | than for me, because the transcription part of the recording   |
|  | 1 1  |
| 10:27 30   | service didn't work. There's an actual recording itself of the   |
| 10:27 31   | service didn't work. There's an actual recording itself of the hearing, that's okay, so we'll be able to back-track and do the   |
| 10:27 31<br>10:27 32   | service didn't work. There's an actual recording itself of the hearing, that's okay, so we'll be able to back-track and do the transcription of the bits that were missing. So there will still be   |
| 10:27 31   | service didn't work. There's an actual recording itself of the hearing, that's okay, so we'll be able to back-track and do the   |
| 10:27 31<br>10:27 32<br>10:27 33   | service didn't work. There's an actual recording itself of the hearing, that's okay, so we'll be able to back-track and do the transcription of the bits that were missing. So there will still be   |
| 10:27 31<br>10:27 32<br>10:27 33<br>10:27 34   | service didn't work. There's an actual recording itself of the hearing, that's okay, so we'll be able to back-track and do the transcription of the bits that were missing. So there will still be a full record of all that's been said.  |
| 10:27 31<br>10:27 32<br>10:27 33<br>10:27 34<br>10:27 35<br>10:27 36<br>10:27 37   | service didn't work. There's an actual recording itself of the hearing, that's okay, so we'll be able to back-track and do the transcription of the bits that were missing. So there will still be a full record of all that's been said.  MR GRAY: While we're on the topic of the transcript, can I just seek clarification about the status of the transcript?  |
| 10:27 31<br>10:27 32<br>10:27 33<br>10:27 34<br>10:27 35<br>10:27 36<br>10:27 37<br>10:27 38   | service didn't work. COMMISSIONER: Everything is being kept confidential, and it's probably just as easy to deal with the point now. At the moment, everything is restricted publication and restricted just to Commission staff and you and those people who you've identified should have information available. In due course, which might mean in about a week, maybe a fraction longer, my intention is to make the transcript, probably the video recording, if anybody  |
| 10:27 31<br>10:27 32<br>10:27 33<br>10:27 34<br>10:27 35<br>10:27 36<br>10:27 37<br>10:27 38<br>10:27 39<br>10:27 40<br>10:27 41<br>10:28 42<br>10:28 43<br>10:28 44<br>10:28 45 | service didn't work. There's an actual recording itself of the hearing, that's okay, so we'll be able to back-track and do the transcription of the bits that were missing. So there will still be a full record of all that's been said.  MR GRAY: While we're on the topic of the transcript, can I just seek clarification about the status of the transcript?  COMMISSIONER: Everything is being kept confidential, and it's probably just as easy to deal with the point now. At the moment, everything is restricted publication and restricted just to Commission staff and you and those people who you've identified should have information available. In due course, which might mean in about a week, maybe a fraction longer, my intention is to make the transcript, probably the video recording, if anybody wants that as well, available to at least the Crown parties, and |

```
10:28 1
            be restricted and confined within the Crown group, and I don't
10:28 2
            anticipate any problems about that. So it's my current intention
10:28 3
            not to make this public unless you're content with parts of it to
            become public, but if you're not, I understand that, but at some
10:28 4
10:29 5
            stage it will have to go to the Crown parties so they can see what
            we've been dealing with, and then maybe we can have
10:29 6
10:29 7
            a discussion then about whether it should become fully public or
            some of it, or if at all. I assume you're quite content to leave that
10:29 8
10:29 9
            to be sorted out at another day?
10:29 10
10:29 11
            MR GRAY: I am. I do seek an opportunity --- I should have
            announced my appearance, of course. I'm appearing with
10:29 12
10:29 13
            Mr Avres for the State of Victoria. I would seek an opportunity
10:29 14
            on behalf of the State to be heard on the question of whether,
10:29 15
            unexpectedly, any PII, public interest immunity, issues arise in
10:29 16
            respect of the transcript.
10:29 17
10:29 18
            COMMISSIONER: Unambiguously you'll be heard on that. And
10:29 19
            I suppose somebody like your junior will be keeping his eye on
            what may or may not fall under some privilege regime. I suspect
10:30 20
10:30 21
            that maybe very little that will happen today will be privileged.
10:30 22
            Maybe some of it will. But I hope not.
10:30 23
10:30 24
            MR GRAY: That's our expectation as well.
10:30 25
10:30 26
            COMMISSIONER: But just in case.
10:30 27
10:30 28
            MR GRAY: Yes, and for that purpose, we come to the hearing,
10:30 29
            including the witness coming to this hearing, with the
            understanding that he should only describe the case studies, if
10:30 30
10:30 31
            I can use that expression, at the highest level to avoid detail.
10:30 32
10:30 33
            COMMISSIONER: Correct. That was my understanding of the
10:30 34
            basis upon which the Commander will give his evidence, and if
10:30 35
            he was going to go into any more detail, I would have stopped
            him, to the extent that I'm able to do that.
10:30 36
10:30 37
10:30 38
            MR GRAY: Thank you, Commissioner. I believe we were
            mid-way through hearing from Acting Assistant Commissioner
10:31 39
            Frewen on the previous Casino Crime Unit. Would you like me
10:31 40
10:31 41
            to restate the question?
10:31 42
            COMMISSIONER: No. You're happy to go on?
10:31 43
10:31 44
10:31 45
            A. I am indeed.
```

COMMISSIONER: Good.

10:31 46 10:31 47

| 10.01             |  |
|-------------------|--|
| 10:31 1           |  |
| 10:31 2           | A. So, generally speaking, the Casino Crime Squad at that            |
| 10:31 3           | stage was responsible for a 24/7 presence at the casino, the         |
| 10:31 4           | collection of intelligence on behalf of Victoria Police and/or other |
| 10:31 5           | agencies as the need necessitated, providing an investigative        |
| 10:31 6           | response to a variety of different themes, including suspected       |
| 10:31 7           | international cheats, money laundering activities, counterfeiting    |
| 10:31 8           | and other suspicious activity, as well as a primary response, I      |
| 10:31 9           | guess, in and around the Crown Casino complex for other type of      |
| 10:32 10          | crimes that presented on a day-to-day basis that weren't too         |
| 10:32 11          | sophisticated; ongoing liaison with other law enforcement            |
| 10:32 11          | agencies and sharing that intelligence, and as I alluded to earlier, |
| 10:32 12          | providing investigative support to other agencies and other parts    |
| 10:32 13          | of Victoria Police that had cause to deal with Crown Casino, and     |
| 10.32 14          |  |
|                   | engaging with other regulation bodies that had cause to do           |
| 10:32 16          | business either within or with Crown Casino.                         |
| 10:32 17          |  |
| 10:32 18          | COMMISSIONER: At the time, which is really from the                  |
| 10:32 19          | commencement of this squad through to 2005-2006, was it              |
| 10:32 20          | regarded as a reasonably successful operation from a policing        |
| 10:32 21          | perspective?   |
| 10:32 22          |  |
| 10:32 23          | A. At the time it was, but like all things, it's a rapidly evolving  |
| 10:33 24          | environment. Over time, Crime Command at Victoria Police saw         |
| 10:33 25          | the need to prioritise resources, some of whom were those            |
| 10:33 26          | resources embedded in Crown that were able to do some of those       |
| 10:33 27          | tasks in a better way, particularly around, you know, money          |
| 10:33 28          | laundering, intelligence capture, et cetera, et cetera. Because      |
| 10:33 29          | probably in the last 10 years, things have moved very, very          |
| 10:33 30          | quickly in society with the evolution of tech, digital platforms,    |
| 10:33 31          | et cetera, and accordingly we've had to adapt and evolve at          |
| 10:33 32          | an equally fast pace as we can, as have other law enforcement        |
| 10:33 33          | agencies. Accordingly, investigation models evolve, and over         |
| 10:33 34          | time, particularly I think from memory, by the year 2006, things     |
| 10:33 35          | had sort of changed quite rapidly. Boston Consulting came in         |
| 10:34 36          | and did a review of Crime Command, how we were structured,           |
| 10:34 37          | whether we met community needs, whether we met Government            |
| 10:34 38          | needs, organisational needs, and the Major Crime Management          |
| 10:34 39          | Model was, I guess, formulated as a result of that consultation      |
| 10:34 40          | process. And essentially and the legislative obligation of           |
| 10:34 41          | embedding people within Crown ceased, and there was also             |
| 10:34 41 10:34 42 |  |
|                   | a co-funding arrangement from the proceeds of gambling that          |
| 10:34 43          | funded that presence. That ceased. And accordingly, we found         |
| 10:34 44          | better ways of delivering the business, particularly at a higher     |
| 10:34 45          | level, which is where we are aiming to impact in money               |
| 10:34 46          | laundering, organised crime, and I think from memory it was          |
| 10:34 47          | around 2006 that the casino unit closed and formed part of Crime     |

| 10:35 1  | Command organised crime, and also part of it was, particularly  |
|--|---|
| 10:35 2  | around the intelligence capture and management, transitioned  |
| 10:35 3  | across to Intelligence and Covert Support Command.  |
| 10:35 4  |   |
| 10:35 5  | COMMISSIONER: Does it follow from that you might not  |
| 10:35 6  | want to answer this question either, and if you don't, I get it that  |
| 10:35 7  | if funding was not an issue, you think that policing is more  |
| 10:35 8  | effective now in the current world we live, than it might have  |
| 10:35 9  | been, say, in 2006 and earlier, which is really to ask you, if you  |
| 10:35 10   | had a choice about it, would you re-introduce that kind of that   |
| 10:35 11   | number of police at the casino, or do you think that that's just not  |
| 10:35 12   | how we would go today?  |
| 10:35 13   |   |
| 10:35 14   | A. I think there are a couple of different parts in motion there,   |
| 10:35 15   | and the first one is around, I guess, police presence generally in  |
| 10:36 16   | public places and large public places. There is a place for that,   |
| 10:36 17   | and I think, for all intents and purposes, that could effectively and   |
| 10:36 18   | efficiently be discharged by, say, a uniform presence, which is   |
| 10:36 19   | how we do business now. If I would think of the recent evolution  |
| 10:36 20   | of crime, investigative models and frameworks and how we're   |
| 10:36 21   | dealing with our partner agencies, which is really the future, the  |
| 10:36 22   | current status quo is where it sits, and I don't think there is any   |
| 10:36 23   | real effective or efficient gains to be made by I guess   |
| 10:36 24   |   |
| 10:36 25   | COMMISSIONER: Going backwards?  |
|  |   |
| 10:36 26   | A leave in a instantian and in an affiliation aid.  |
| 10:36 27   | A housing investigators in an off-location site. Because  |
| 10:36 27<br>10:36 28   | that in itself creates disconnection, and it's a perception of  |
| 10:36 27<br>10:36 28<br>10:36 29   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other  |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto,   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think  |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is  |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is  |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.  COMMISSIONER: Thanks.  |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37<br>10:37 38   | that in itself creates disconnection, and it's a perception of disconnection. COMMISSIONER: Thanks.  MR GRAY: Thank you, Commissioner. I'll move off that topic if that's all right.   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37<br>10:37 38<br>10:37 39<br>10:37 40   | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.  COMMISSIONER: Thanks.  MR GRAY: Thank you, Commissioner. I'll move off that topic  |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37<br>10:37 38<br>10:37 39<br>10:37 40<br>10:37 41                                     | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.  COMMISSIONER: Thanks.  MR GRAY: Thank you, Commissioner. I'll move off that topic if that's all right.  Could I just ask a little bit more about the partner agencies, and   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37<br>10:37 38<br>10:37 39<br>10:37 40<br>10:37 41<br>10:37 42                         | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.  COMMISSIONER: Thanks.  MR GRAY: Thank you, Commissioner. I'll move off that topic if that's all right.  Could I just ask a little bit more about the partner agencies, and before going to the role of the partner agencies, the role of   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37<br>10:37 38<br>10:37 39<br>10:37 40<br>10:37 41<br>10:37 42<br>10:37 43             | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.  COMMISSIONER: Thanks.  MR GRAY: Thank you, Commissioner. I'll move off that topic if that's all right.  Could I just ask a little bit more about the partner agencies, and before going to the role of the partner agencies, the role of another command within Victoria Police. You've mentioned  |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37<br>10:37 38<br>10:37 39<br>10:37 40<br>10:37 41<br>10:37 42<br>10:37 43<br>10:37 44 | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.  COMMISSIONER: Thanks.  MR GRAY: Thank you, Commissioner. I'll move off that topic if that's all right.  Could I just ask a little bit more about the partner agencies, and before going to the role of the partner agencies, the role of another command within Victoria Police. You've mentioned intelligence a number of times as an important piece in this   |
| 10:36 27<br>10:36 28<br>10:36 29<br>10:37 30<br>10:37 31<br>10:37 32<br>10:37 33<br>10:37 34<br>10:37 35<br>10:37 36<br>10:37 37<br>10:37 38<br>10:37 39<br>10:37 40<br>10:37 41<br>10:37 42<br>10:37 43<br>10:37 44 | that in itself creates disconnection, and it's a perception of disconnection. Everything is available, particularly with other agencies, everything is in the cloud, it's online, it's digital, crypto, and whilst we all talk about cash as being ever present, I think we've really got to be live to the proposition that that is a diminishing commodity, and banking and business models move, and I think we need to do the same.  COMMISSIONER: Thanks.  MR GRAY: Thank you, Commissioner. I'll move off that topic if that's all right.  Could I just ask a little bit more about the partner agencies, and before going to the role of the partner agencies, the role of another command within Victoria Police. You've mentioned intelligence a number of times as an important piece in this overall picture. What are the dynamics within Victoria Police, in |

| 10:38 1              | ICSC?   |
|----------------------|---|
| 10:38 2              |   |
| 10:38 3              | A. Sure. So Crime Command, very generally, is responsible   |
| 10:38 4              | for undertaking high-end serious and organised crime  |
| 10:38 5              | investigation in the State of Victoria. So that's our core business   |
| 10:38 6              | statement, generally. Intelligence and Covert Support Command,  |
| 10:38 7              | as its name denotes, is around the collection and building up of  |
| 10:38 8              | credible, effective, efficient intelligence processes, I guess  |
| 10:38 9              | liaising and building really strong networks with partner agencies,   |
| 10:38 10             | Government authorities, non-Government authorities and  |
| 10:38 11             | business around intelligence capture processes, undertaking   |
| 10:38 12<br>10:38 13 | intelligence probes into different organisations, people, entities,   |
| 10.38 13             | building up meaningful, worthwhile, actionable intelligence that informs the strategic and tactical investigation directions of |
| 10:38 15             | VicPol, the ACIC, AFP, AUSTRAC, Border Force. Ever  |
| 10:39 16             | present, every day in organised crime, the intersections of all of  |
| 10:39 17             | these agencies, the themes and the commonalities are profound.  |
| 10:39 18             | And as I've found, even in my most recent two-year tenure in my   |
| 10:39 19             | current role, we are doing more and more business with these  |
| 10:39 20             | other agencies because that is the nature of organised crime.   |
| 10:39 21             |   |
| 10:39 22             | Intelligence Covert Support Command will, after building up   |
| 10:39 23             | worthwhile, meaningful, actionable intelligence, will refer that  |
| 10:39 24             | off to, generally speaking, particular work units within Crime  |
| 10:39 25             | Command, but accordingly, where there is really worthwhile  |
| 10:39 26             | intelligence, I guess transition that to other agencies, particularly   |
| 10:39 27             | relating to Commonwealth-themed investigations or where there's   |
| 10:40 28             | a better Commonwealth opportunity of management enforcement   |
| 10:40 29             | outcome.  |
| 10:40 30<br>10:40 31 | COMMISSIONED. Can you give some idea of the seriousness   |
| 10:40 31 10:40 32    | COMMISSIONER: Can you give some idea of the seriousness of I mean, as much as you can, in dollar terms the sorts of             |
| 10:40 32             | areas of work that you're talking bout? If I was to take drug   |
| 10:40 34             | turnover, drug money, money laundering, what sort of  |
| 10:40 35             | dimensions are we speaking about? Billions of dollars? Millions   |
| 10:40 36             | of dollars?   |
| 10:40 37             |   |
| 10:40 38             | A. As what we know, and the old tip of the ice-berg analogy   |
| 10:40 39             | is, it is billions of dollars. We are doing   |
| 10:40 40             |   |
| 10:40 41             | COMMISSIONER: You mean per annum?   |
| 10:40 42             |   |
| 10:40 43             | A. Per annum. Probably whilst we could talk at a State level,   |
| 10:40 44             | a lot of our work is at National level, particularly in the organised   |
| 10:40 45             | crime domain, particularly with drug trafficking. Drugs come in   |
| 10:41 46             | from all modalities; offshore, whether it's container, plane,   |
| 10:41 47             | human, and boat. So the aim is obviously to interdict where we  |

10:41 1 can, but that money --- I mean, in the last six months, we have been involved in the seizures of significant amounts of cash, for 10:41 2 10:41 3 example in semi-trailers, that are criss-crossing Australia and they 10:41 4 are definitely linked to organised crime. Now, how they remit that money physically is very interesting, and whether it's in 10:41 5 10:41 6 a semi-trailer with \$10 million cash which happened most 10:41 recently in Perth, a truck, a semi-trailer, \$10 million cash and a high amount of chemicals, I can't recall the type of chemical, 10:41 8 10:41 9 but that's coming --- or was destined to Melbourne. Now, where 10:41 10 that ultimately was meant to be delivered and how that was meant 10:42 11 to be distributed is anyone's guess. But I would humbly assert that they would probably use many different methods, and that is 10:42 12 10:42 13 just but one example on one day, and that was an outlaw 10:42 14 motorcycle gang. As you know, we all know, there are many outlaw motorcycle gangs existing in Victoria and Australia, not to 10:42 15 10:42 16 mention criminal gangs. So I guess that is a snapshot of one day's work in another State of product and cash destined for Victoria. 10:42 17 10:42 18 10:42 19 COMMISSIONER: If I wanted a feel for the amount of cash that 10:42 20 the people you are talking about want to clean up, launder, are we talking also in terms of millions or billions of dollars a year? 10:42 21 10:43 22 10:43 23 A. I would say so, and you know, recently Crime Command 10:43 24 had cause to do a search warrant on a fairly non-descript John Doe-type individual. And they executed the search warrant, inner 10:43 25 city Melbourne, located in a very, very dense estate of apartments 10:43 26 10:43 27 and townhouses, drug lab downstairs, \$13 million cash 10:43 28 distributed variously upstairs and throughout the house, \$2 million cash in a roof of a house of the accused's parents in 10:43 29 10:43 30 another suburb, a storage container in another suburb, I think another \$3 or \$5 million cash. And this individual was on no 10:43 31 10:43 32 one's radar, and barely on ours. And, you know, when you go 10:44 33 into those properties, which I actually did go into that just 10:44 34 because it was so extraordinary, it's astonishing to see that 10:44 35 amount of cash in Prada bags and plastic bags, and what we learned from that, one of our partner agencies compared notes 10:44 36 with us and were able to correlate another cash transfer organised 10:44 37 10:44 38 crime syndicate that were involved with this individual, and they 10:44 39 never pieced it together until we found this cash on this particular 10:44 40 day and they essentially referenced a surveillance activity where 10:44 41 they lost the person they were following, and it wasn't until we 10:44 42 shared our intelligence with them, they dug up some open-source public footage from a publicly-available camera and the same 10:45 43 10:45 44 parties are meeting. 10:45 45

10:45 46

10:45 47

So the inter-connectivity is just present every day. And that other syndicate that they were working on, they're moving millions of

| 10:45 | 1  | dollars a week. That agency referred to Victoria Police what          |
|-------|----|---|
| 10:45 | 2  | I call a quick referral, as in, "We have contemporary intelligence    |
| 10:45 | 3  | on this particular individual. Here's their address. There's          |
| 10:45 | 4  | probably money there based on what we've learnt and what we           |
| 10:45 | 5  | know."  |
| 10:45 | 6  |   |
| 10:45 | 7  | We executed a search warrant. Confidential                            |
| 10:45 | 8  | Confidential  |
| 10:45 | 9  | Confidential  |
| 10:45 | 10 | I guess the real point here is the inter-connectivity of all of these |
| 10:46 | 11 | groups. We think that they're siloed because of whether they're       |
| 10:46 | 12 | an outlaw motorcycle gang, an Albanian crime gang, a Middle           |
| 10:46 | 13 | Eastern gang, an Asian crime gang from offshore, they're all on       |
| 10:46 |    | the continuum and they're all intersecting, and as business           |
| 10:46 |    | evolves, so do they. And I think they just look for the best          |
| 10:46 |    | opportunity that they can.  |
| 10:46 |    | opportunity than arry than  |
| 10:46 |    | COMMISSIONER: If I had \$10 million in cash illegally                 |
| 10:46 |    | obtained and I wanted to clean it up, where are the sorts of places   |
| 10:46 |    | that I would go, what kinds of things would I do to do that? Just     |
| 10:46 |    | assume I don't have \$10 million in cash.                             |
| 10:46 |    |   |
| 10:46 |    | A. Well, you would probably do what these organised crime             |
| 10:46 |    | gangs do: Diversify their interests.                                  |
| 10:46 |    | <i>gg.</i> , ,  |
| 10:46 |    | COMMISSIONER: Meaning?  |
| 10:46 |    | <b>6</b>  |
| 10:46 |    | A. Well, it might be if it was Mick Frewen doing this,                |
| 10:47 |    | I would certainly be looking at a conversion to crypto currency,      |
| 10:47 | 30 | and I would be moving it offshore and then bouncing it through a      |
| 10:47 | 31 | number of crypto exchanges, then going onto the dark net from         |
| 10:47 |    | Melbourne with my seeded crypto wallet and going and                  |
| 10:47 | 33 | essentially looking on the dark net for the best exchange rate        |
| 10:47 |    | who's got the highest amount of good user ratings, and going,         |
| 10:47 |    | "Okay, I will contact person X. I have \$10 million. I want to        |
| 10:47 | 36 | redeem" whatever the crypto equivalent on today's exchange            |
| 10:47 | 37 | rate, "I want \$1 million cash from the equivalent crypto." And       |
| 10:47 |    | when you look on the dark net, there are people that can deliver,     |
| 10:47 |    | within one hour in Melbourne, \$300,000 cash. Some will offer         |
| 10:47 |    | a million, some will offer \$500,000. So I would wash it that way.    |
| 10:47 |    | ***************************************                               |
| 10:47 |    | COMMISSIONER: What would I physically do? So I've got my              |
| 10:48 | 43 | \$10 million sitting in my plastic bag in the hallway. What do        |
| 10:48 |    | I actually physically do or   |
| 10:48 |    | KIN K   |
| 10:48 |    | A. So you can do the reverse of that. You can grab that plastic       |
| 10:48 |    | bag of, say, \$1 million, in round terms, and do the reverse of that. |

10:48 1 Go onto a dark net crypto exchange, tell them, "I want to do a \$1 million cash to a crypto exchange", go to a pre-determined 10:48 2 10:48 3 meeting location, they'll do the transaction in front of you, all on 10:48 4 the dark net, and then you're away. So you then have a crypto exchange, you'll put it into your encrypted seeded 26-letter 10:48 5 10:48 6 authentication so no one can crack it, and then you will then 10:48 7 proceed to bounce that maybe around to other crypto exchanges. You may choose to redeem it elsewhere at another time in 10:48 8 10:48 9 another country, to your liking. That's just but one example. You 10:48 10 may choose to swap it for drugs, you may choose to swap it for 10:49 11 another commodity, you might kite-fly it amongst other bank accounts. You can purchase off the dark net what we call 10:49 12 10:49 13 redundant bank accounts from people, or generally students who leave Australia and their bank accounts are dormant. Those 10:49 14 10:49 15 credentials you can buy on the dark net. 10:49 16 10:49 17 MR GRAY: Commissioner, I just ask a question at this point 10:49 18 relating to your other questions? 10:49 19 COMMISSIONER: Sure. 10:49 20 10:49 21 10:49 22 MR GRAY: Acting Assistant Commissioner, is there a case study based on an investigation by your command or involving 10:49 23 10:49 24 your command which you can describe at a high level which demonstrates the connection between criminal activity in the 10:49 25 10:49 26 nature of drug trafficking in this particular example, the use of 10:49 27 crypto currency, and the use of I think what are described as mules at the casino? 10:50 28 10:50 29 10:50 30 COMMISSIONER: He's just trying to shortcut what I'm asking. 10:50 31 10:50 32 A. Righto. So this is quite an interesting one that pretty much 10:50 33 collects all of that. For example, an organised crime figure in 10:50 34 Sydney receives 3 Bitcoin over the course of a month from the 10:50 35 progressive sale of illicit chemicals. And that person wants to redeem that Bitcoin. Their ultimate plan is to somehow wash that 10:50 36 cash in order to finance the purchase of a unit in Perth. So what 10:50 37 10:50 38 that person does is travel to Melbourne, goes on to the dark net using a money remitter and exchanges that 3 Bitcoin for around 10:50 39 10:50 40 \$216,000 via a Bitcoin exchange, less the small commission. 10:50 41 They then utilise several money mules. They attend Crown, and they then progressively cash in small deposits which are under the 10:51 42 threshold reporting rate of 10K, to the amount of the 216,000. 10:51 43 10:51 44 The subject and those mules play a number of games really for 10:51 45 a nil-all draw outcome, and then at the end of it they combine the

10:51 46

10:51 47

gambling chips and approach the cashier to obtain a total amount

for that sum of \$216,000, depending on their minor wins and

10:51 1 losses. 10:51 2 10:51 3 Now, if the money mules are trusted, there could be multiple 10:51 4 cheques issued to each of those money mules by Crown Casino, and those money mules will then transfer those winnings into 10:51 5 10:51 6 accounts nominated by that drug dealer from Sydney, and they could be either within Australia or offshore, they could be shell 10:52 companies, they could be illegally sourced dark net bank account 10:52 8 10:52 9 details. 10:52 10 10:52 11 That person returns to Sydney and goes straight to the bank. If they chose not to do that and just took the \$216,000 cheque, that 10:52 12 10:52 13 drug dealer returns to Sydney, cashes in the \$216,000 cheque to the bank and says, "I had a win at the casino. I was on a work 10:52 14 trip down to Melbourne." What they then do is fly to Fremantle, 10:52 15 10:52 16 withdraw that \$216,000 from the legitimate bank account and use 10:52 17 that as a deposit to pay for that unit. You can do that operation 10:52 18 three times over in a month, or less, and clearly finance 10:52 19 a residential property in a state other than their own. 10:52 20 10:52 21 MR GRAY: Might I just continue in that vein? 10:53 22 10:53 23 COMMISSIONER: Sure. 10:53 24 10:53 25 MR GRAY: What's "layering" in this context, and you can move 10:53 26 outside that particular case study, based on your knowledge in 10:53 27 your command and given your previous experience, what's layering and if you could cover the particular role of what you've 10:53 28 10:53 29 just described as money mules and other terms such as structuring 10:53 30 and smurfing. 10:53 31 10:53 32 A. Right. So layering is essentially kite-flying, for the want of 10:53 33 a better expression. So you may have cash either sourced from 10:53 34 offshore or in Australia, it's irrelevant, to be frank, and then what 10:53 35 happens is that layering process is around eroding the original capital value of that money, talk round terms of \$500,000. That 10:53 36 10:53 37 would then be sent to multiple accounts, both within Australia, 10:54 38 offshore, could be China, Malaysia, Singapore, all of which are 10:54 39 generally questionable account credentials, very, very difficult to 10:54 40 find who the end user is. But let's take it on face value that that 10:54 41 500 is disseminated quite quickly over 30 different bank 10:54 42 accounts. And that is then flown across multiple bank accounts again, all in indiscriminate amounts, which makes it very, very 10:54 43 10:54 44 difficult for financial agencies such as AUSTRAC to track. 10:54 45 And --10:54 46 10:54 47 Q. Just stopping you there. What's the relevance here of the

```
10:54 1
            AMLCTF, Anti-Money Laundering and Counter-Terrorism
10:54 2
            Financing Rules and Act threshold limit?
10:54 3
10:54 4
            A. Yes, which is 10,000.
10:54 5
10:54 6
            Q. Yes, and what's the connection between that threshold limit
10:55 7
            and the activity you're describing? Is there a connection?
10:55 8
10:55 9
            A. Well, they can choose to either keep it below that threshold
10:55 10
            limit. On some occasions, some institutions may be alert to those
            sorts of suspicious transactions, so they'll do an own-motion
10:55 11
            notification. For those occasions where the amount is actually
10:55 12
10:55 13
            higher than the threshold amount, it proves to be an ever-present
10:55 14
            challenge for those agencies to actually track and trace and
10:55 15
            identify those entities that sit behind the accounts. And
10:55 16
            eventually, whether it's days, weeks, months, that money will
             then float discreetly back into Australia, and bearing in mind that
10:55 17
            could happen again in a variety of ways. It might find its way
10:55 18
10:55 19
             into shell companies, shell accounts, a crypto currency account,
             an account in Crown Casino, or some other modality. But that
10:55 20
             layering is the erosion and then slow build-up again of the capital.
10:55 21
10:56 22
             And it could even be reinvested as an offshore deposit to pay for
            real estate. That's the challenge.
10:56 23
10:56 24
10:56 25
            COMMISSIONER: If I was a casino operator and I had the real
            potential for the kind of people you're talking about to come to
10:56 26
            my institution for the purposes of cleaning up their money, what
10:56 27
            could I do? What are the sorts of things I could look out for to
10:56 28
             prevent that happening? I guess one thing I get from what you're
10:56 29
            telling me is, "Prevent it happening? Forget about it." But what
10:56 30
10:56 31
            could I pick up? What sorts of things would I look out for to see
10:56 32
             whether this was going on or even to reduce it?
10:57 33
10:57 34
             A. It's a big domain to tackle, but I guess generally speaking,
10:57 35
             there would be worthwhile opportunity in thinking about, first
             and foremost, the types of people that frequent the casino, and
10:57 36
             whether they're offshore, the premise of how they come to be
10:57 37
10:57 38
             attracted to casino A, what are the enticements that are provided
10:57 39
             to individuals or companies that facilitate such travel, not only
             what onshore arrangements regarding money-handling processes,
10:57 40
10:57 41
             account rigour, but what are the rules of engagement for offshore
```

could look at.

10:58 42

10:58 43

10:58 44 10:58 45

10:58 46

10:58 47

money coming in? And I guess what the parameters, legislatively

or logistically are manageable to somehow keep track of that and

control it. It becomes almost --- in its current form that we're

dealing with, those examples I gave, it's intractable. It's really, really difficult to manage. And that would be one area that one

```
10:58 1
10:58 2
            I guess the other area is how threshold reporting is managed. Is
10:58 3
            there opportunity to perhaps do it in real time? Again, that might
10:58 4
            be an infrastructure or logistical challenge, because it seems from
            some of the experiences that we've had, that there's a degree of
10:58 5
10:59 6
            latency of the transaction occurring before notification finally
10:59 7
            finds its way through, and there's obligatory challenges around
            the administrative and logistical administrative burden on
10:59 8
10:59 9
            whoever the operator may be in complying with that.
10:59 10
10:59 11
            I guess a couple of points that I've touched on with regard to
            those recent examples is one key word, and that's "legitimacy".
10:59 12
10:59 13
             How do we build legitimacy in the operation and the rigour
             around that, and the legitimacy that the person who is cashing
10:59 14
10:59 15
             that chip or cheque is actually that person?
10:59 16
10:59 17
            COMMISSIONER: But how do you work that out? If you gave
10:59 18
            me $100,000 to go to the casino, let's say I haven't been before or
11:00 19
            I've been there once or twice. I walk in there, they wouldn't know
            who I was, so I show them my driver's licence or whatever it
11:00 20
            might be. It won't be $100,000. Let's do it below the reporting
11:00 21
11:00 22
            threshold. You give me $9,000 to do it. On what basis would
             they check me out to see whether they should report my $9,000 or
11:00 23
11:00 24
            just give me chips and let me gamble to my heart's content?
11:00 25
11:00 26
            A. That's a real challenge, and I can't provide you, at the
11:00 27
            moment, a real solution to that, I don't think. I need to take that
            on notice and deeply think around what our opportunities are.
11:00 28
11:00 29
            I go back to my previous expression around legitimacy; whether
11:00 30
            people have to register with photographic ID as a starting point
11:00 31
            to, I guess, build credentials for those walk-ins that you're just
11:00 32
            referencing then. What rigour then sits behind those that are
11:01 33
            administering that transaction. How do they have a sense of
            confidence that the person that's giving them that cash is that
11:01 34
11:01 35
            person? I guess that seems to be the first real step, I think, and
            there's probably a lot of legislative remedies that one could look
11:01 36
11:01 37
            at, all of which aren't at my fingertips. I think that is a very, very
            deep and expansive question, and I'd need to think about it
11:01 38
11:01 39
             further, I think, in fairness to me and the meaningful response I'd
11:01 40
            want to give you.
11:01 41
11:01 42
            MR GRAY: Commissioner, I need to ask Commander Frewen
11:01 43
            about some background points that really are important to you
11:01 44
            understanding the limitations on Victoria Police's perspectives on
11:02 45
            these things.
11:02 46
11:02 47
            Acting Assistant Commissioner Frewen, you mentioned a number
```

```
11:02 1
            of partner agencies. You also mentioned the ICSC.
11:02 2
11:02 3
            And I should stipulate that the commander of that command,
11:02 4
            ICSC, is available, should you wish to hear from him,
            Commissioner, say Monday next week and we'll wait to hear
11:02 5
11:02 6
            from you whether you do.
11:02 7
11:02 8
            Could you just very briefly, Commander Frewen, tell the
11:02 9
            Commissioner about the role of the key partner agencies you've
11:02 10
            mentioned, specifically with respect to intelligence and referrals
11:02 11
            around money laundering and organised crime. You mentioned
            the AFP. You mentioned ACIC. You mentioned AUSTRAC.
11:02 12
            I've not sure if you've mentioned the VCGLR. But could vou
11:02 13
11:03 14
            give a brief description of the dynamics between Victoria Police,
            in and in respect of casino when it comes to each of those four
11:03 15
11:03 16
            partner agencies, starting with the AFP?
11:03 17
            A. Sure. I think one important point to make is around money
11:03 18
11:03 19
            laundering legislation generally. And money laundering, I think
            you referenced a little bit earlier, does under the Commonwealth
11:03 20
            Act create specific offences for laundering and structuring
11:03 21
11:03 22
            offences, particularly in the CT domain. Whereas Victoria
            Police, we conduct investigations using specific powers under the
11:03 23
11:03 24
            Confiscation Act 1997, which is a State-based legislation
            instrument, and information derived from those type of
11:03 25
11:04 26
            investigations, it's a civil forfeiture mechanism, so we're quite
11:04 27
            distinct in how we apply the crime investigation component, as
11:04 28
            opposed to the, I guess, asset confiscation activity. They're kept
            separate for that reason, and we primarily focus our crim
11:04 29
            proceeds squad on State-based activity. We do work quite
11:04 30
11:04 31
            extensively with those Commonwealth agencies, but by and large,
11:04 32
            60 per cent of their work would be with Crime Command, and
11:04 33
            they would do 40 per cent work with external regions and
11:04 34
            commands relevant to VicPol activity.
11:04 35
11:04 36
            Q. In your answer you mentioned "CT".
11:04 37
11:04 38
            A. Counter-terrorism.
11:04 39
11:04 40
            Q. Thank you.
11:04 41
11:04 42
            A. And to that end, obviously the Commonwealth legislation
            really clearly provides, you know, opportunity for
11:05 43
            Commonwealth agencies, the first one being the AFP. They've
11:05 44
11:05 45
            got both a national and international presence regarding the
            investigation and cooperation with other agencies of
11:05 46
```

11:05 47

Commonwealth-themed investigations pursuant --- their Proceeds

- 11:05 1 of Crime Act. They work in partnership with other law
- 11:05 2 enforcement agencies and entities, regulatory agencies to identify
- 11:05 3 and prosecute offences at the Commonwealth level. The
- 11:05 4 Australian Crime and Intelligence Commission, ACIC, from our
- 11:05 5 perspective are a really valued partner. They're a national
- 11:05 6 criminal intelligence collection agency established, I think, in
- 11:05 7 around 2006. And primarily they collect both international and
- 11:05 8 national intelligence through their partnership arrangements, both
- 11:06 9 nationally and internationally, to bring investigative and
- 11:06 10 intelligence opportunity to high-priority, complex, serious crime
- 11:06 11 investigation, which includes money laundering, drug trafficking,
- 11:06 12 firearms, people trafficking and strong collaboration, I can talk at
- 11:06 13 a State level, with VicPol.
- 11:06 14
- 11:06 15 AUSTRAC, Australian Transactions Reports and Analysis
- 11:06 16 Centre, really, in many respects, the gate-keeper of the nation's
- 11:06 17 banking system, around the integrity and rigour of our banking
- 11:06 18 system and transactions, and they contribute to, I guess, the
- 11:06 19 national rigour around reporting of suspicious transactions,
- 11:06 20 suspected laundering, financing of terrorism, suspicious offshore
- 11:06 21 transactions, suspicious onshore transactions, and their primary
- 11:07 22 remit is to build up credible financial intelligence to support other
- 11:07 23 high-end organised crime investigational opportunities, either at
- 11:07 24 a Commonwealth level or with State-based agencies.
- 11:07 25
- 11:07 26 Victorian Commission for Gaming and Liquor Regulation, they're
- 11:07 27 an amalgamation of Liquor Licensing Victoria and the Victorian
- 11:07 28 Commission of Gaming and Regulation. They're focused on the
- 11:07 29 people, premises, products and promotion to ensure Victoria's
- 11:07 30 gambling and liquor industry is adequately monitored, policed,
- 11:07 31 and I guess has sufficient rigour around the day-to-day activities.
- 11:07 32 Again, they produce --- identify and prosecute breaches, collect
- 11:07 33 intelligence, and we share intelligence from them in a reciprocal
- 11:08 34 basis.
- 11:08 35
- 11:08 36 Q. Thank you. There's some constraints, are there, on what
- 11:08 37 Victoria Police is permitted to do under the conditions through
- 11:08 38 which it receives intelligence from some of those partner agencies
- 11:08 39 such as the ACIC; is that right?
- 11:08 40
- 11:08 41 A. Conditions?
- 11:08 42
- 11:08 43 Q. Does the ACIC provide intelligence to Victoria Police
- 11:08 44 without conditions as to its further use, or are there conditions
- 11:08 45 placed?
- 11:08 46
- 11:08 47 A. There are caveats, but generally those referrals will come

- 11:08 1 into Intelligence and Covert Support Command. Sporadically,
- 11:08 2 they will do a direct referral to Crime Command, but as a general
- 11:08 3 proposition, we will find they've got a specific remit around their
- 11:08 4 areas of focus. Often they align with our work, and we're very
- 11:08 5 careful with how we manage their intelligence, their sources. We
- 11:09 6 essentially get delivered a meaningful proposition for
- 11:09 7 investigation, and we don't have any interaction with their
- 11:09 8 intelligence process or their sources.
- 11:09 9
- 11:09 10 Q. I think I'll move now to the progress that's been made in
- 11:09 11 response to the request for a statement we received from the
- 11:09 12 Royal Commission on 26 April. Acting Assistant Commissioner
- 11:09 13 Frewen, it's the case, isn't it, that you are able to describe at a high
- 11:09 14 level certain illustrative case studies that are responsive to that
- 11:09 15 request that I've just mentioned?
- 11:09 16
- 11:09 17 A. Yes.
- 11:09 18 11:09 19 Q. But you're not attempting to provide a comprehensive list
- 11:09 20 of all investigations that might fall within that request; is that
- 11:09 21 right?
- 11:09 22
- 11:09 23 A. Correct.
- 11:09 24
- 11:09 25 Q. It's the case, isn't it, that there would be PII concerns in
- 11:10 26 respect of the details, and you're not going to go into the details
- 11:10 27 today in any event; is that correct?
- 11:10 28
- 11:10 29 A. Yes.
- 11:10 30
- 11:10 31 Q. And furthermore, there's a limitation on the perspective of
- 11:10 32 Victoria Police in respect of aspects of these matters, isn't there?
- 11:10 33 Can you just outline the nature of that limitation in broad terms
- 11:10 34 for the Commissioner?
- 11:10 35
- 11:10 36 A. We're a State-based organisation, and as aspirational as we
- 11:10 37 will try to be to deliver, you know, higher-order national and
- 11:10 38 international investigative outcomes, we are obliged to the people
- 11:10 39 and the Government of Victoria to deliver a policing service, and
- 11:10 40 there are legislative barriers, logistical barriers, particularly with
- 11:10 41 how we conduct investigations. So, for example, an international
- 11:11 42 money laundering operation, we would operate that in
- 11:11 43 collaboration with the ACIC, AUSTRAC, the AFP. We simply
- 11:11 44 don't have the reach. We would then provide them with credible
- 11:11 45 intelligence that would hopefully enliven an intelligence probe or
- 11:11 46 an active investigation that they could pursue either in their own
- 11:11 47 right or with another agency or international law enforcement

- 11:11 1 body. But it's worth noting the fundamentals of organised crime investigation, the tectonic plates have shifted significantly, even 11:11 2 11:11 3 in the last five years, around how we do our business. Everything 11:11 4 has a national or an international flavour, whether it's drug 11:11 5 trafficking, money laundering, firearms trafficking, syndicated 11:12 6 child pornography. We've all seen the pervasiveness coming in 11:12 from offshore, and with I guess cloud-based services, end-to-end 11:12 8 encryption, crypto currency, the dark net, these are really 11:12 9 challenging investigational barriers that all law enforcement 11:12 10 agencies, government agencies are grappling with. And the 11:12 11 internet of things is a great opportunity for us all, but there is that counter-balance that we're learning every day around 11:12 12 11:12 13 opportunities this provides for anonymity of organised crime 11:12 14 individuals and entities. 11:13 15 11:13 16 Q. I'm going to ask you to describe at a high level some of 11:13 17 these case studies in respect of money laundering. You've
- already mentioned the one involving Bitcoin, so I won't ask you 11:13 18 11:13 19 about that again. Can I ask you about, and just a high-level description of this, an investigation that Victoria Police became 11:13 20 involved in on a referral from ACIC in 2017? Just to help you 11:13 21 11:13 22 understand which one I have in mind, it involved large-scale cash laundering involving multiple persons and owing to a junket 11:13 23 11:13 24 operator. Are you able to outline to the Commissioner at a broad, 11:13 25 high-level descriptive level the nature of that case study, without 11:13 26 going into details, please?

11:13 26 going into details, please? 11:13 27

11:15 47

11:13 28 A. I think I've got a couple that I could proffer for us. So I might not get it right in context, as we've recalled it, but for 11:13 29 11:13 30 example, what we call a boiler house operation, that was 11:14 31 essentially a pop-up criminal enterprise in a suburb of Melbourne. 11:14 32 And what those individuals are, are a sophisticated, multi-faceted, 11:14 33 international crime operation. And they will target vulnerable 11:14 34 people, usually overseas students, for the want of being too 11:14 35 specific, and they will either send them a package or engage them in some way, shape or form, with a view to compromising them 11:14 36 to pay money. And that may be for an international warrant of 11:14 37 11:14 38 arrest against them, it might be that they are the subject of 11:14 39 an active drug investigation, they've been embroiled and 11:14 40 implicated in serious criminal offences back home and their 11:14 41 family's in danger, right to the other end of the spectrum where 11:14 42 they have manipulated these individuals to basically stage their own kidnapping and then reach out and go to their family, go to 11:15 43 11:15 44 their friends or somehow raise money to pay a fictitious ransom. 11:15 45 That money is then invariably paid, whatever the value and whatever the, I guess, the modality, whether it's crypto or cash or 11:15 46

a direct deposit. It doesn't really matter. But one experience is

- 11:15 1 some of those people were forced to pay money into Crown
- 11:15 2 Casino accounts, which then transitioned out of that into a junket
- 11:15 3 tour operator's account, which we duly followed, and then I guess
- 11:15 4 the anonymity really became a challenge because, referencing my
- 11:15 5 earlier examples around shell accounts, shell companies, procured
- 11:16 6 dormant bank accounts, it then became really difficult to work
- 11:16 7 through the junket operator, whether they were the junket
- 11:16 8 operator or the junket representative. We eventually tracked one
- 11:16 9 individual. He claimed he didn't have any knowledge of this
- 11:16 10 significant deposit. We couldn't identify where the money had
- 11:16 11 gone. It had since gone out of that junket account offshore, and it
- 11:16 12 was gone. But in the meantime, we kept pursuing that junket
- 11:16 13 operator. It then became increasingly untenable, because
- 11:16 14 anonymity just kept presenting itself at every corner with every
- 11:16 15 account. They then engaged their legal representation, claiming
- 11:16 16 that it was a breach of privacy to supply details, and effectively
- 11:17 17 the investigation stalled on tracking that money.
- 11:17 18
- 11:17 19 Q. Thank you. And that certainly was one of the matters. In
- 11:17 20 respect of the referral from ACIC in 2017, was there a matter
- 11:17 21 involving depositing of cash through the casino involving
- 11:17 22 multiple persons that you're going to be able to describe at a high
- 11:17 23 level?
- 11:17 24
- 11:17 25 A. Just bear with me. I've got a couple of examples here that
- 11:17 26 I'm working through.
- 11:17 27 11:17 28 Q. Yes.
- 11:17 29
- 11:17 30 A. I have it here. So this was a cross-jurisdictional
- 11:17 31 investigation into organised crime by the ACIC, which the ACIC
- 11:18 32 in turn referred to Victoria Police Piranha Taskforce. It was into
- 11:18 33 money laundering activities from Star City Casino through to
- 11:18 34 Crown Casino in Melbourne. People of interest were observed in
- 11:18 35 car parks, public toilets, where large bags of cash changed hands.
- 11:18 36 People of interest were linked to other investigations, variously
- 11:18 37 linked as cash couriers for other serious and organised crime
- 11:18 38 groups that were linked to junket tour operators with movements
- 11:18 39 monitored and coordinated across multiple States and
- 11:18 40 jurisdictions in Australia. Multiple amounts of cash were seized.
- 11:18 41 That was a successful prosecution under the Money Laundering
- 11:18 42 and Counter-Terrorism Sentencing Act.
- 11:19 43
- 11:19 44 Q. Thank you.
- 11:19 45
- 11:19 46 MR GRAY: More detail will be available through an appropriate
- 11:19 47 PII filter, but we'll probably leave it at that level, Commissioner.

| 11:19 | 1  | Is that all right?   |
|-------|----|--|
| 11:19 | 2  | COMMISSIONED V. C. 1 VII. C.       |
| 11:19 | 3  | COMMISSIONER: Yes, fine, but I've got a few questions, if              |
| 11:19 | 4  | I could ask them.  |
| 11:19 | 5  |  |
| 11:19 | 6  | MR GRAY: Yes, of course.   |
| 11:19 | 7  |  |
| 11:19 | 8  | COMMISSIONER: You told me earlier about the relationships              |
| 11:19 | 9  | and working cooperatively with Australian agencies, mostly             |
| 11:19 |    | federal. Does VicPol have a similar working relationship with          |
| 11:19 |    | international overseas agencies Confidential                           |
| 11:19 |    | Confidential I don't know what exists                                  |
| 11:19 |    | over there, but other types of agencies that could provide you         |
| 11:19 |    | with helpful, useful information?                                      |
| 11:19 |    |  |
| 11:19 |    | A. We do. For example, we have a strong working                        |
| 11:19 |    | relationship with Confidential   |
| 11:20 |    | Confidential   |
| 11:20 |    | because if we were looking at sourcing evidentiary material, that      |
| 11:20 |    | does take time, and we are obliged to work through our liaison         |
| 11:20 |    | officers. But there are many, many informal networks, for              |
| 11:20 |    | example, in the State Anti-Gangs Division. They have really            |
| 11:20 |    | value connections in the Confidential                                  |
| 11:20 |    | Confidential   |
| 11:20 |    | those relationships do exist. But the procurement of, you know,        |
| 11:20 |    | legally-obtained evidence, we take more of a formal approach           |
| 11:20 |    | around mutual letters of assistance that are, you know, raised with    |
| 11:20 |    | a view to executing warrants in other countries and jurisdictions      |
| 11:20 |    | other than Australia. That, regrettably, sometimes can take a long     |
| 11:21 |    | time.  |
| 11:21 |    |  |
| 11:21 | 32 | COMMISSIONER: Yes. One reason I asked the question is in               |
| 11:21 | 33 | particular with regard to junkets and junket operators. In             |
| 11:21 |    | Victoria, it used to be that the regulator, not the current regulator, |
| 11:21 |    | I think it was in the earlier form, would effectively register junket  |
| 11:21 | 36 | operators, do enough work to make sure that the junket operator        |
| 11:21 | 37 | was legitimate and could bring over tours of people to gamble at       |
| 11:21 | 38 | casinos here, or at the casino here. My question really is at two      |
| 11:21 | 39 | levels: If a Government agency was tasked with approving               |
| 11:21 | 40 | a junket operator, is that like a realistic function that              |
| 11:22 | 41 | a Government agency could perform? In other words, would               |
| 11:22 | 42 | a Government agency ever have access to sufficient information         |
| 11:22 | 43 | to be satisfied that, if it gives a particular operator a tick of      |
| 11:22 |    | approval or registers it or him or her, that that was safe enough?     |
| 11:22 | 45 |  |
| 11:22 | 46 | A. Interesting question.   |
| 11.22 | 47 |  |

11:22 1 COMMISSIONER: Just to fill it out a bit, in Singapore, 11:22 2 a government agency or the Government certifies that, "Ah, 11:22 3 junket operators, okay", they've certified three, that's it. I don't 11:22 4 know how many people have applied for permission, but only 11:22 5 three have got through. I just wonder if it wasn't left to the casino 11:22 6 operator itself to vet, but it was shifted back to a government 11:23 7 agency --- there might be all sorts of difficulties about whether 11:23 8 that's shifting the responsibility in the right direction, but I'm 11:23 9 really interested in your view about whether it's really possible. 11:23 10 11:23 11 A. If I could return volley and ask one back? 11:23 12 11:23 13 COMMISSIONER: Yes? 11:23 14 11:23 15 A. Are we talking for the State of Victoria? 11:23 16 11:23 17 COMMISSIONER: It has to be for the State of Victoria, only for jurisdictional reasons. It can't work --11:23 18 11:23 19 11:23 20 A. Because thinking, you know, from a national approach of, I guess, commonality of --- if a junket operator was approved to 11:23 21 11:23 22 come into Australia, that might be more effective and efficient, but equally provide a greater opportunity for rigour. 11:23 23 11:23 24 11:23 25 COMMISSIONER: Yes. 11:23 26 11:23 27 A. That would be one thing I would probably --11:23 28 11:23 29 COMMISSIONER: Because the resources available would be 11:23 30 far greater? 11:23 31 11:23 32 A. Well, Commonwealth level, you could have --- I'm just 11:24 33 thinking out loud here. It could be undertaken by Home Affairs 11:24 34 that have information-sharing arrangements with all of the 11:24 35 agencies that we've spoken of today, and importantly, you know, whether that junket operator chose to work out of Sydney, Perth 11:24 36 11:24 37 or Melbourne, there could be a degree of confidence that we've 11:24 38 looked at them as judiciously as we can. Because, you know, 11:24 39 they are more mobile than we. That would be my first 11:24 40 consideration. You asked if it is logistically possible? I don't 11:24 41 know. Is it worthwhile? I think it speaks for itself that it is. So 11:24 42 where's the public value in that exercise? I'd probably say, you 11:24 43 know, it's worth contemplating, and the opportunity cost is that if 11:25 44 we've got really high rigour around how those junket operators 11:25 45 are approved, how they operate, and from where they bring their

11:25 46

11:25 47

people, and importantly who those people are, that seems to be something that we've not spoken about generally, not just here.

11:25 1 We're a bit silent on that. Because casinos attract a whole lot of 11:25 2 different people, and often the people that are attracted to casinos 11:25 3 may have nefarious means for using a casino. That, I think, is 11:25 4 something that we need to consider as well as the junket operator. 11:26 5 11:26 6 COMMISSIONER: And leaving the position as it presently is, 11:26 7 which is the casino operator, or at least in Victoria, that's not true 11:26 8 everywhere, it's different in Queensland, but leaving the position 11:26 9 of the casino operator having to itself inform and make necessary 11:26 10 inquiries and so on, not only about the junket operator but the 11:26 11 people who are behind the junket operator, or the people who just want to come here on the junket operator's tour, what's your take 11:26 12 11:26 13 on the capacity of the casino operator to do that in any sense 11:26 14 effectively? 11:26 15 11:26 16 A. I don't know whether I can really go into that at much detail 11:26 17 because I don't know the extent to which their systems and operations --11:26 18 11:26 19 11:26 20 COMMISSIONER: Well, part of it might be what resources would the casino operator have, where could they go, compared 11:26 21 11:27 22 with, say, a Government agency who, I assume, has got far greater capacity to get the information that you would want to 11:27 23 11:27 24 have to check it out thoroughly? 11:27 25 11:27 26 A. It's probably then, thinking out loud, a dichotomy of 11:27 27 perceptions of who the casino would think are okay as opposed to 11:27 28 a Government agency, who may take a competing view. That 11:27 29 I think would potentially --- I don't know, it might end in 11:27 30 disagreement about particular operators, I don't know. But there 11:27 31 is no doubt that the ability to have access to credible intelligence 11:27 32 and information, a government agency, whoever and wherever 11:27 33 they are, would be supported by the right legislative framework 11:28 34 and information-sharing arrangements in quick time would 11:28 35 probably be able to discharge that much more effectively, with more rigour, and provide everyone a greater sense of confidence 11:28 36 11:28 37 that those who are coming through the turn-style are as good as 11:28 38 we can be at a point in time. 11:28 39 11:28 40 The other aspect is money. I don't know, as an afterthought, 11:28 41 talking through this point with you, we talk about the people, the 11:28 42 means of the people in this circumstance for junket purposes, is it's all about the money. So pondering financial sources, financial 11:28 43 11:29 44 rigour, where that money comes from. I don't know, that is 11:29 45 probably --11:29 46

11:29 47

COMMISSIONER: You're trying to look for it if you could?

```
11:29 1
11:29 2
            A. --- the wicked part of the problem, I think, that I can't
11:29 3
            address at the moment. It's a problem, I can see it. I just don't
11:29 4
            know what to do about it as I'm talking to you.
11:29 5
11:29 6
            COMMISSIONER: We might come back to you about that one
11:29 7
            day.
11:29 8
11:29 9
            MR GRAY: Commissioner, I'm in your hands, but I was
11:29 10
            intending to just get a brief high-level description from the
11:29 11
            witness of a couple more case studies.
11:29 12
11:29 13
            COMMISSIONER: Yes.
11:29 14
11:29 15
            MR GRAY: So, Commander, there's a case study you can
11:29 16
            describe, I understand, in relation to just an example of what
            might be regarded as a fairly simple scenario where suspected
11:29 17
            criminals have cash --- this is really harking back to a question
11:29 18
11:29 19
            asked by the Commissioner a short time ago --- and as
            I understand it, there's a transaction involving chips to wash or
11:30 20
11:30 21
            launder that cash.
11:30 22
11:30 23
            A. Sure. So you might have --- offenders could have extensive
            what we call chip cash-outs, and that is of 10,000 or more from
11:30 24
11:30 25
            Crown, so 60,000 in the first three months where one individual
            the preceding year has "lost", in inverted commas, approximately
11:30 26
11:30 27
            75,000. In 2012, Crown expressed its suspicions in relation to
            another individual where a $22,000 chip cash-out took place, but
11:30 28
            there was no gaming activity recorded, which obviously alerted
11:30 29
11:31 30
            them to the fact that something nefarious was underway.
11:31 31
11:31 32
            Q. Alerted "them"? Alerted who?
11:31 33
11:31 34
            A. Yeah, yeah. And they --
11:31 35
11:31 36
            Q. Alerted the casino?
11:31 37
            A. Yeah, and they've identified that person X has cashed in,
11:31 38
            but they haven't been --
11:31 39
11:31 40
11:31 41
            COMMISSIONER: They haven't been doing it on the tables?
11:31 42
11:31 43
            A. Correct. And they were ultimately implicated in
11:31 44
            a large-scale commercial drug operation which they were
11:31 45
            ultimately charged for. Our Criminal Proceeds Squad did
            an asset sweep on both of those individuals, and despite records
11:31 46
            of substantial gambling, and significant cash movement through
11:31 47
```

11:31 1 the casino, no assets were identified, so there was no confiscation 11:31 2 opportunity. But I guess at its lowest level, that's the throughput 11:32 3 we're looking at. So I think you asked me a question earlier, does 11:32 4 organised crime create millions or billions of dollars per day or 11:32 5 per week, I don't recall, but these, I guess, snapshots provide 11:32 6 a little bit of an insight into the frequency of these people doing 11:32 7 that, the frequency of their trading, and the frequency of cash 11:32 8 movement or laundering more generally. 11:32 9 11:32 10 We think about this example. This is in 2012. We are now in 11:32 11 2021, and the ever-present world of crypto and encryption is providing worldly opportunity to organised crime that we 11:32 12 11:33 13 probably haven't even conceived or contemplated yet. 11:33 14 11:33 15 MR GRAY: Thank you. There's another case study, and then I'll 11:33 16 leave the case studies, essentially, involving --- perhaps it's money laundering. You can tell the Commissioner whether you regard it 11:33 17 as money laundering or not. But it in a way involves the use, as I 11:33 18 11:33 19 understand it, of a casino account as a bank while a person served time for criminal offences involving drugs, I believe. Would you 11:33 20 outline that case study at a high level, please, Commander? 11:33 21 11:33 22 11:33 23 A. Sure. So in this matter, Victoria Police crime proceeds 11:33 24 squad assisted New South Wales Police Organised Crime Squad 11:33 25 in relation to a person that they charged in New South Wales. That individual held a sum of \$500,000 in their Crown account. 11:34 26 11:34 27 Crown apparently identified this \$500,000 sum and referred the 11:34 28 matter to VicPol as a suspect matter report. Ironically, it was 11:34 29 around the same time that New South Wales had been making 11:34 30 enquiries anyway. A search warrant was executed on Crown 11:34 31 Casino. The \$500.000 was seized out of that individual's account, and that was transferred to the New South Wales Crime 11:34 32 11:34 33 Commission and forfeited. 11:34 34 11:34 35 Now, there's one missing aspect of that, and that was that that person was in custody in New South Wales, and a third person 11:34 36 contacted Crown from New South Wales requesting to cash that 11:34 37 11:35 38 cheque out. So it was, in many respects, a de facto superannuation fund, where a third party was endeavouring to 11:35 39 11:35 40 access that money for and on behalf of, or maybe without their 11:35 41 knowledge, I don't know, but clearly an example of, I guess, 11:35 42 an opportunity to lie dormant funds, and cashing a cheque out can be done by anyone; hence, the involvement of that third person. 11:35 43

11:35 44 11:35 45

11:35 46 11:35 47

an appropriate point to leave this examination on. There are

description of the case studies there, and perhaps this is

MR GRAY: Commissioner, we'll probably leave the high-level

```
11:35 1
            some requests at point 3 of the request for a statement for some
            opinion evidence about the sorts of factors that either alone or in
11:36 2
            combination increase the risk of money laundering at or linked to
11:36 3
11:36 4
            Crown Casino. I'll ask Acting Assistant Commissioner Frewen
11:36 5
            about that matter, and then that will conclude the questions.
11:36 6
11:36 7
            COMMISSIONER: Thanks, Mr Gray.
11:36 8
11:36 9
            MR GRAY: Acting Assistant Commissioner, what are the
11:36 10
            factors that increase the risk of money laundering at or linked to
11:36 11
            the casino, and if you could address environmental factors first,
11:36 12
            please.
11:36 13
11:36 14
            A. Sure. So I guess the attraction of the environment itself
11:36 15
            is it's an entertainment precinct, large amounts of people, large
11:36 16
            amounts of cash are generally transacted on a day-to-day basis,
11:36 17
            morning, noon or night. In my humble view, that does make it
            attractive to money laundering and drug crime to operate
11:37 18
11:37 19
            simultaneously. As I've referenced in earlier examples, you
11:37 20
            know, there is opportunity for multiple people at multiple times,
11:37 21
            or simultaneously, to launder money. Part of the same syndicate
            vis-a-vis the smurfing example I provided earlier. Confident
11:37 22
11:37 23
            Confidential
                                                     which makes it
11:37 24
            difficult for, I guess, reconstruction of offender movements or
11:37 25
            suspect movements, particularly around cash movements. I guess
11:37 26
            there's the other aspect, which is when you think of a large venue,
            people can operate very anonymously, for all of the reasons that
11:37 27
11:38 28
            we've discussed, and the huge volumes of cash that are carried
11:38 29
            around, that are dealt with, that are transacted normalises the
11:38 30
            presence of large amounts of cash. And in any other area or
            domain of activity, I don't think that people would ordinarily see
11:38 31
11:38 32
            that.
11:38 33
11:38 34
            COMMISSIONER: Presumably, once upon a time, it was the
11:38 35
            race track --
11:38 36
11:38 37
            A. Correct.
11:38 38
11:38 39
            COMMISSIONER: --- where people did take large amounts of
11:38 40
            cash, and I guess that what the casinos around the world have
11:38 41
            come to do is, in a large sense, replace the race track.
11:38 42
11:38 43
            A. Yes.
11:38 44
11:38 45
            COMMISSIONER: Is there any other place? I don't know of
            any other place where there's large amounts of money, like used
11:38 46
            to be at the races, now at the casino. Leaving aside sort of secret
11:38 47
```

```
11:38 1
            gambling dens and leaving aside electronic trading and currency
11:39 2
            and that kind of thing, there's really nowhere else, is there, in this
11:39 3
            country where such large amounts of cash are the order of the day
11:39 4
            and don't, by themselves, attract suspicion?
11:39 5
11:39 6
            A. Yeah, agree. Yeah, I can't think of anything off the top of
11:39 7
            my head.
11:39 8
11:39 9
            MR GRAY: In respect of any particular aspects of Melbourne
11:39 10
            casino's operations, are there factors or contributing factors that
11:39 11
            create a safe environment in that way for money laundering?
11:39 12
11:39 13
             A. Well, there's the age-old challenge of incentivisation. Who
11:39 14
            you attract and how you attract particular individuals, whether
11:39 15
            they are high or low net worth, whether they form part of a junket
11:40 16
            tour or form part of a broader recruitment campaign for organised
11:40 17
            crime. What I mean by that is that organised crime groups and
            entities are very good at manipulating people and getting them to
11:40 18
11:40 19
             feel good about themselves and to demonstrate to them the value
             of being involved in organised crime, and whether they almost
11:40 20
            subcontract that incentivisation down to people that they are
11:40 21
11:40 22
            looking to recruit by using the same incentivisation through
            Crown, the procurement of food and beverage, gifts, credit, really
11:40 23
11:40 24
            places them in a spot that those organised crime entities need
            them to be. And extending lines of credit is a compelling way, in
11:40 25
             many cases, to entangle people into a web of getting them to do
11:41 26
11:41 27
             what you want them to do by way of paying back that line of
            credit, either directly or indirectly through acts or I guess support.
11:41 28
11:41 29
11:41 30
             Q. Are you talking about other customers of the casino
11:41 31
            extending lines of credit to people who are in the casino
11:41 32
            environment, or are you talking about junkets [unclear]?
11:41 33
11:41 34
             A. All of the above. There is certainly opportunity for
11:41 35
            organised crime to finance the extension of those lines of credit.
             So person A, for whatever reason, is frequenting the company of
11:41 36
11:41 37
            particular organised crime entities. They may have got them to
11:42 38
            do one cash run. They may have them selling drugs. They may
11:42 39
            have them as a people trafficker, sex trafficker, coordinating
11:42 40
            unlicensed brothels. All of that are practical applications of how
11:42 41
             they co-opt operatives or foot soldiers to do the doing, and
11:42 42
            creating that distance. When people, I guess, are progressively
            empowered by others to appoint those others empowering them
11:42 43
11:42 44
            can turn the switch and start manipulating them and get them to
11:42 45
            do acts or things that they need them to do, and whether it's
             a direct line of credit or whether it's credit afforded through third
11:42 46
             parties. It might even be, you know, Crown extending a line of
11:42 47
```

- 11:42 1 credit themselves. It could be any of those propositions.
- 11:43 2
- 11:43 3 Q. All right. Finally, is there anything you wanted to say at
- 11:43 4 this point about adequacy of monitoring and regulation you
- 11:43 5 regard as contributing factors?
- 11:43 6
- 11:43 7 A. I'll probably take that on notice, I think. You know, when
- 11:43 8 you say "adequacy of regulation" and the monitoring, it's a big --
- 11:43 9
- 11:43 10 COMMISSIONER: Big topic.
- 11:43 11
- 11:43 12 A. --- big topic. I could probably talk for a long time on that.
- 11:43 13
- 11:43 14 MR GRAY: I think that's a signal this examination has come to
- 11:43 15 an end.
- 11:43 16
- 11:43 17 COMMISSIONER: Ignore the question.
- 11:43 18
- 11:43 19 A. Thank you, Commissioner.
- 11:43 20
- 11:43 21 COMMISSIONER: Thank you, Mr Gray.
- 11:43 22
- 11:43 23 MR FINANZIO: So just picking up that last question, if we gave
- 11:43 24 you notice in a request for a statement, you might be prepared to
- 11:43 25 go in to think about it?
- 11:43 26
- 11:43 27 A. We all have ideas, and I'd certainly look --
- 11:44 28
- 11:44 29 Q. Have some ideas on things --
- 11:44 30
- 11:44 31 A. Indeed.
- 11:44 32
- 11:44 33 Q. Commissioner, I've got a couple of questions about some of
- 11:44 34 the things you've said, but in no particular order. I've followed
- 11:44 35 everything you've said, but it's gone about a bit, so I'll just go in
- 11:44 36 the order that it comes to me. You mentioned a minute ago that
- 11:44 37 the camera security at the casino rubs out in about five days; is
- 11:44 38 that right?
- 11:44 39
- 11:44 40 A. That's as I'm informed, yes.
- 11:44 41
- 11:44 42 Q. And you don't have control over that. When you're talking
- 11:44 43 about the camera security, that's the casino's operation's
- 11:44 44 surveillance team, is that right?
- 11:44 45
- 11:44 46 A. It is, but it comes down to the statutory requirement to
- 11:44 47 retain camera footage, and I --

```
11:44 1
11:44 2
            Q. So that's a condition of its licence?
11:44 3
11:44 4
            A. I would assume it would be.
11:45 5
            Q. Whether it's the liquor licence or its gaming licence, you're
       6
       7
            not sure?
       8
       9
            A. Correct.
      10
11:45 11
            Q. So that means that I'm right in saying that if you need some
            surveillance from the casino, you have to ask them? Something
11:45 12
            happens at the casino, or you're investigating something, you
11:45 13
            have to ask the casino for its assistance?
11:45 14
11:45 15
11:45 16
            A. On the casino floor?
11:45 17
11:45 18
            O. Yes.
11:45 19
11:45 20
            A. Not a real-time investigation, but rather a historic incident
            that we're looking at?
11:45 21
11:45 22
11:45 23
            Q. Correct.
11:45 24
11:45 25
            A. Correct, I'd agree with that proposition.
11:45 26
11:45 27
            Q. In a real-time, you might --
11:45 28
11:45 29
            A. Explore other opportunities.
11:45 30
11:45 31
            Q. --- or use other of your powers to obtain that information?
11:45 32
11:45 33
            A. Correct.
11:45 34
11:45 35
            Q. Just on that, if you obtain that information yourself as part
            of one of your investigations, that's information obviously
11:45 36
            obtained by you?
11:45 37
11:45 38
            A. Yes.
11:45 39
11:45 40
11:45 41
            Q. You might share that with other agencies such as ACIC, but
            you're under no restriction in the same way that you might be that
11:45 42
            was alluded to by my learned friend, you're under no similar
11:46 43
            restriction that you might be if ACIC shares information with
11:46 44
11:46 45
            you?
11:46 46
11:46 47
            A. We own the product.
```

```
11:46 1
11:46 2
            Q. You own the product?
11:46 3
11:46 4
            A. Correct.
11:46 5
11:46 6
            Q. And you could produce that product to this Commission,
11:46 7
            subject to any PII issues that might be raised?
11:46 8
11:46 9
            A. I would think so.
11:46 10
11:46 11
            Q. Just on the five-day period, you may not know or you may
            need to get more information about this, but when the Casino
11:46 12
            Squad was at the casino, it had its own access to surveillance,
11:46 13
11:46 14
            I understand. Is that right?
11:46 15
11:46 16
            A. I have to take it --- when you say "own access to
11:46 17
            surveillance" --
11:46 18
11:46 19
            O. Did it have its own link or feed to the cameras and its own
            capacity to record things independently of the casino surveillance
11:46 20
11:47 21
            operations?
11:47 22
11:47 23
            A. I can't speak to that, but I would probably think practically,
11:47 24
            and there may be a live feed to a monitor in an office or
            a multiple set of monitors on a wall which would depict different
11:47 25
            zones. However, I do not know if there's a recording capacity,
11:47 26
11:47 27
            point one. And point two, again, how long --- and if it didn't have
11:47 28
            a recorded capacity, I'd say opportunity of retrieval of that
11:47 29
            footage would be the same as it is for any other need.
11:47 30
11:47 31
            Q. But I'm gathering from the way you've said this that you're
11:47 32
            not sure --
11:47 33
11:47 34
            A. Correct.
11:47 35
11:47 36
            Q. --- about what the situation was before, I think it was, 2006?
11:48 37
            A. Yes.
11:48 38
11:48 39
11:48 40
            Q. Okay. Again on my theory of no particular order, you
            described for us in your evidence the structure of modern crime
11:48 41
            investigation models. Have I got that right? Is that the right
11:48 42
11:48 43
            terminology?
11:48 44
11:48 45
            A. That'll do us.
11:48 46
11:48 47
            Q. Okay. And the Commissioner has the benefit of the note
```

```
11:48 1
            that was --- the precis. Do you have that there?
11:48 2
11:48 3
            Does the witness have that? It doesn't matter. It's okay. In that
11:48 4
            note, there is a division --- it's a four-page note that was, I think,
            prepared by Senior Counsel to help me understand what he was
11:48 5
            going to ask you about and help the Commissioner to do that too.
11:48 6
            On page 1 of that, under paragraph D, "Crime Command
11:49 7
            Structural Overview". How new is that structure?
11:49 8
11:49 9
11:49 10
            A. It's current.
11:49 11
11:49 12
            Q. It's current?
11:49 13
11:49 14
            A. Yes, it's current.
11:49 15
11:49 16
            Q. Yes, but how new is it? Was there a structure that was
            different to this before the current structure?
11:49 17
11:49 18
11:49 19
            A. I would most certainly say so, but I hasten to add, it's going
            to change again within the next six months.
11:49 20
11:49 21
11:49 22
            Q. Okay.
11:49 23
11:49 24
            A. Again, in I guess the evolution of crime investigation has
            seen the need to refocus.
11:49 25
11:49 26
11:49 27
            Q. All organisational management [indistinct] is this structure
            the structure that was in place between, say, 2013 and now? Or
11:49 28
11:50 29
            have there been other changes?
11:50 30
11:50 31
            A. There may have been minor nuances. I worked within the
11:50 32
            command last --- I think I left --- it would have been around 2013
11:50 33
            or 2014, I think, from memory, and essentially it was the same.
11:50 34
11:50 35
            Q. So the Commissioner asked you a question early on about
            the distinction between serious crime and organised crime. Do
11:50 36
            you recall that series of questions?
11:50 37
11:50 38
            A. Yes.
11:50 39
11:50 40
11:50 41
            Q. And you, when you were giving your evidence before,
11:50 42
            almost at the end, talked about there being a whole range of levels
            at which criminal activity can gather and accumulate at the
11:50 43
11:50 44
            casino. Where would low-level prostitution or drug trafficking fit
```

Where would that fit?

11:51 45

11:51 46

11:51 47

into the spectrum of serious crime versus stuff that isn't in the purview of the serious crime division? Where would it fit?

```
11:51 1
11:51 2
            A. Well, it essentially depends on the theme and how that
11:51 3
            investigation evolved. I'll probably take it back one step with
11:51 4
            regard to the Crime Command structure. So, generally speaking,
            Crime Command operate under what we refer to as the
11:51 5
11:51 6
            accountability and resource model, and that is generally
11:51
      7
            a classification of crime, so we'll use your analogy of drug
11:51 8
            trafficking, and we break drug trafficking into three categories;
11:51 9
            category 1, 2 and 3 respectively. Category 1 is high-end,
11:52 10
            high-order, complex drug trafficking, multiple entities, you know,
11:52 11
            complicated for all the reasons we've probably discussed and may
            involve some theming with other serious crime. That is a
11:52 12
11:52 13
            category 1. Crime Command maintain primacy for category 1
11:52 14
            investigations.
11:52 15
11:52 16
            Category 2, the bar obviously lowers. Less complex, may involve
11:52 17
            a whole lot of support services and expertise. Crime Command
            may have involvement, but may not have primacy. Or depending
11:52 18
11:52 19
            upon, you know, local factors or some other imperative, we may
11:52 20
            keep primacy at category 2.
11:52 21
11:52 22
            Category 3, low level, using your expression, street level, low
11:52 23
            volume, single-type transactions that we stumble across through
11:52 24
            the media often. That would be done at a local policing level.
11:52 25
11:52 26
            Q. Yes. So just a couple of things about that. So when you
11:52 27
            talk about primacy, you're really talking about oversight of that
11:53 28
            investigation; is that correct?
11:53 29
11:53 30
            A. Who owns the investigation.
11:53 31
11:53 32
            Q. Who owns the investigation. And the more complex, like
11:53 33
            any organisational structure, there are people at the top to whom
            everybody reports that information?
11:53 34
11:53 35
11:53 36
            A. Could you rephrase that?
11:53 37
11:53 38
            Q. That the information is collated and collected and
            synthesised centrally?
11:53 39
11:53 40
11:53 41
            A. The intelligence?
11:53 42
11:53 43
            Q. Yes.
11:53 44
11:53 45
            A. Yes.
11:53 46
```

11:53 47

Q. Okay. The serious crime and organised crime divisions are

```
11:53 1
            involved with matters at --- or investigations at that higher level,
11:53 2
            aren't they?
11:53 3
11:53 4
            A. Correct.
11:53 5
11:53 6
            O. You don't mean --
11:53 7
11:53 8
            A. I hasten to add, though, that they do contribute to
11:53 9
            lower-order investigations where expertise could be required.
11:53 10
            We can offer a credible intelligence picture or some other
11:54 11
            support. It's not a binary "we're in or out".
11:54 12
11:54 13
             O. So the information flows as the need requires, up and down
11:54 14
            the information chain?
11:54 15
11:54 16
            A. Correct.
11:54 17
11:54 18
             Q. And it's right, in your organisation, that information is
11:54 19
             triaged as it moves up and down the chain?
11:54 20
            A. Correct.
11:54 21
11:54 22
11:54 23
            Q. You don't mean to say by your evidence here that the
            engagement of criminal activity in casinos is only through serious
11:54 24
11:54 25
            or organised crime, do you? There's all kind of activity that goes
            on in a casino that might be connected to lower-order criminal
11:54 26
11:54 27
            activity?
11:54 28
11:54 29
            A. Potentially.
11:54 30
11:54 31
            Q. There are a number of ways in which serious crime gathers
11:55 32
            money together, usually in cash. Is that fair to say?
11:55 33
            A. Yes.
11:55 34
11:55 35
11:55 36
            Q. And one of the tricky parts is to try and find a way that the
            cash makes it into the system, and the casino is one, that is the
11:55 37
            normal banking system [indistinct].
11:55 38
11:55 39
11:55 40
            A. Yes.
11:55 41
11:55 42
            Q. When you talked about before serious crime or organised
            crime, the process of putting the money into the ordinary banking
11:55 43
            system through the casino is a component part of the overall
11:55 44
11:55 45
            investigation, isn't it?
11:55 46
```

11:55 47

A. Yes.

11:55 1 11:55 2 Q. It's the point at which the money is inserted. It's not all the 11:55 3 criminal activity. 11:55 4 11:55 5 A. It's a transaction point. 11:55 6 11:55 7 Q. It's a transaction point. 11:55 8 11:55 9 A. And that could vary. 11:55 10 Q. It could vary, and it might not be the casino; it might be any 11:55 11 number of other activities? 11:55 12 11:56 13 11:56 14 A. Correct. 11:56 15 11:56 16 Q. So the focus of those serious crime investigations is what's 11:56 17 going on before and what happens to that money after. I think you mentioned the --- I can't remember the name of the division, 11:56 18 11:56 19 the money division? 11:56 20 11:56 21 A. The Criminal Proceeds Squad. 11:56 22 11:56 23 Q. That's it. And the money might pass through the casino in 11:56 24 fact quite briefly? 11:56 25 11:56 26 A. Indeed. 11:56 27 11:56 28 Q. And nothing that the people do in the casino might be necessarily illegal? 11:56 29 11:56 30 11:56 31 A. (Witness nods). 11:56 32 11:56 33 Q. But the people who are doing it, I think you described them 11:56 34 as money mules or whatever, they might interact with other 11:56 35 people at the casino? 11:56 36 11:56 37 A. Yes. 11:56 38 11:56 39 Q. Casino staff or junket staff. And those interactions are not necessarily important for the broader investigation that you're 11:56 40 11:57 41 conducting? 11:57 42 11:57 43 A. Potentially not. It's difficult to say. 11:57 44 11:57 45 Q. Can I just take you to that note that was provided a minute

I just want to put something to you.

11:57 46

11:57 47

ago or that I drew your attention to a minute ago. Just to be clear,

```
11:57 1
11:57 2
            A. Sure.
11:57 3
11:57 4
            Q. Paragraph F there describes Victoria Police's remit and
            knowledge of money laundering. Paragraph 3 says:
11:57 5
11:57 6
11:57 7
                      A typical pattern of intelligence flow or referral which
                      VicPol obtains incidental knowledge of activities related
11:57 8
11:57 9
                      to Crown Casino.
11:57 10
            You'd agree that sometimes in the kind of scenario that --
11:57 11
11:57 12
11:57 13
            A. Sorry, where are you?
11:57 14
11:57 15
            Q. Oh, sorry, you're not with me. Second page, F,
11:58 16
            paragraph 3.
11:58 17
11:58 18
            A. Under AUSTRAC?
11:58 19
11:58 20
            Q. It doesn't matter. Don't worry. Would you describe it as
            incidental?
11:58 21
11:58 22
11:58 23
            A. Sorry?
11:58 24
11:58 25
            Q. Would you describe those interactions as incidental to the
11:58 26
            investigation overall?
11:58 27
11:58 28
            A. The ones with gaming staff on the floor?
11:58 29
11:58 30
            Q. Exactly.
11:58 31
11:58 32
            A. Potentially, yes.
11:58 33
11:58 34
            Q. The kind of information that might not necessarily feature
11:58 35
            as it moves up the chain from the investigators to someone in
11:58 36
            your position?
11:58 37
            A. It would be triaged, if that's what you're asking. But simply
11:58 38
11:58 39
            put, at my level it would be interagency collaboration. I may
11:59 40
            never see that on any particular theme, and to be frank, nor would
11:59 41
            I expect to.
11:59 42
11:59 43
            Q. No. And you were at one --- I think [indistinct] up till about
11:59 44
            2005, you were a detective sergeant at Melbourne CIB?
11:59 45
11:59 46
            A. Correct.
11:59 47
```

```
11:59 1
            Q. So you had that on-the-ground operational experience --
11:59 2
11:59 3
            A. Yes.
11:59 4
11:59 5
            Q. --- where your police intuition of everyone involved in the
11:59 6
            things that you're investigating, all the people, even though
11:59 7
            they're not necessarily critical to your investigation [indistinct].
11:59 8
11:59 9
            A. Generally, yes.
11:59 10
11:59 11
            Q. Is it right even that some of those incidental observations
11:59 12
            might not even be recorded in your notes, but as a detective
12:00 13
            senior sergeant in charge of all the things that are going on, you
            wouldn't forget them? You wouldn't forget those people and who
12:00 14
12:00 15
            they were?
12:00 16
12:00 17
            A. Hopefully not.
12:00 18
12:00 19
            Q. Now, again, sorry to be flicking to a note --
12:00 20
12:00 21
            MR GRAY: Just for the record, the document I provided to my
12:00 22
            friend was not of evidentiary --
12:00 23
12:00 24
            COMMISSIONER: It is not part of the evidence. Thanks,
12:00 25
            Mr Gray.
12:01 26
12:01 27
            MR FINANZIO: You usefully outlined some case studies before
12:01 28
            at a high level. Are any of those case studies case studies that
12:01 29
            you directly participated in?
12:01 30
12:01 31
            A. No.
12:01 32
12:01 33
            Q. Are you able to identify from the witness box now or at
12:01 34
            some other time that people who would have had the kind of role
12:01 35
            that you had as a Senior Sergeant with that kind of nuanced,
12:01 36
            intuitive knowledge of what was going on?
12:01 37
12:01 38
            A. Potentially.
12:01 39
12:01 40
            Q. Are you able to do it now?
12:01 41
            A. No.
12:01 42
12:01 43
12:01 44
            Q. Okay. All right.
12:01 45
```

12:02 46

12:02 47

Commissioner, I'm mindful there are other topics that I'd explore, but I'm mindful not to explore those topics in the absence of

```
12:02 1
           Crown.
12:02 2
12:02 3
           COMMISSIONER: I don't want any detail of any specific events
12:02 4
           or anything like that at this stage.
12:02 5
12:02 6
           MR FINANZIO: No. Thank you.
12:02 7
12:02 8
           COMMISSIONER: Thank you very much. I don't have any
12:02 9
           other questions. Mr Gray, you don't have anything at all, do you?
12:02 10
12:02 11
            MR GRAY: Just one quick point, if I may, because something
            was made of the reference in the document to incidental
12:02 12
12:02 13
            knowledge.
12:02 14
12:02 15
            COMMISSIONER: Okay.
12:02 16
12:02 17
            MR GRAY: When it comes to money laundering offences, under
12:03 18
            the legislative framework of the entire country, putting aside the
12:03 19
            proceeds of crime legislation in Victoria, to the best of your
12:03 20
            knowledge, is the money laundering offence a set of provisions in
            section 400 of the Commonwealth Criminal Code Act?
12:03 21
12:03 22
            A. Yes.
12:03 23
12:03 24
12:03 25
            Q. And there isn't a detailed money laundering offence regime
            under Victorian statues; is that right?
12:03 26
12:03 27
12:03 28
            A. Correct, that's right.
12:03 29
12:03 30
            COMMISSIONER: I've got just one or two more questions,
12:03 31
            sorry. How risky do you think it is to allow junkets to continue?
12:03 32
            You can take it on notice, if you like, but I'm interested in your --
12:03 33
12:03 34
            A. I will take it on notice, and I have a view. I want a more
12:04 35
            informed delivery to you on that.
12:04 36
12:04 37
            COMMISSIONER: Just assume I'm going to ask you again.
12:04 38
12:04 39
            A. I will, thank you.
12:04 40
12:04 41
            COMMISSIONER: Okay. Is that it for the morning? I'll wait.
12:04 42
12:04 43
12:04 44
            THE WITNESS WITHDREW
12:04 45
12:04 46
12:04 47
            MR FINANZIO: Our approach, Commissioner, may well be to
```

| 12:04 | 1  | refine the Request for Statement that was made on 26 April based |
|-------|----|--|
| 12:04 | 2  | on the evidence we've heard today, to narrow the issues and to   |
| 12:04 | 3  | discuss with our friends about how we might progress those       |
| 12:04 | 4  | matters.   |
| 12:04 | 5  |  |
| 12:04 | 6  | COMMISSIONER: And can you tell me whether we've got              |
| 12:04 | 7  | another member who might give evidence on Monday?                |
| 12:04 | 8  |  |
| 12:04 | 9  | MR FINANZIO: On Monday, yes. We're going to review the           |
| 12:04 | 10 | position this afternoon and advise the State this afternoon      |
| 12:05 | 11 | whether that witness will be required or not.                    |
| 12:05 | 12 |  |
| 12:05 | 13 | COMMISSIONER: Okay, thank you. I'll adjourn.                     |
| 12:05 | 14 | ·  |
| 12:05 | 15 |  |
| 12:05 | 16 | HEARING ADJOURNED AT 12.04 PM UNTIL MONDAY,                      |
| 12:05 | 17 | 10 MAY 2021  |

## **Index of Witness Events**
